

At Full-Load Maximum Speed Control

Figure 4-27

When the accelerator pedal is pressed down all the way and the control lever comes into contact with the maximum speed stopper bolt, the tension of the governor spring becomes maximum.

At this time, the tension lever is fixed at the position where it contacts pin M₁ being pressed into the pump housing. The idle spring is completely compressed to connect the start lever and the tension lever at point A, thereby holding the control sleeve at the full-load position. At this time, the flyweight is pressed by the governor sleeve and is in the completely closed state.
