NOTE: Read the entire instruction manual before starting the installation.

SAFETY CONSIDERATIONS

Read and follow manufacturer instructions carefully. Follow all local electrical codes during installation. All wiring must conform to local and national electrical codes. Improper wiring or installation may damage thermostat.

Recognize safety information. This is the safety-alert symbol. When you see this symbol on the equipment and in the instruction manual, be alert to the potential for personal injury.

Understand the signal words DANGER, WARNING, and CAUTION. These words are used with the safety-alert symbol. DANGER identifies the most serious hazards which will result in severe personal injury or death. WARNING signifies a hazard which could result in personal injury or death. CAUTION is used to identify unsafe practices which would result in minor personal injury or product and property damage.

INTRODUCTION

The Builder's Model thermostat is an electronic 24-vac, non-programmable, manual changeover wall mount thermostat. This thermostat uses a single set point to maintain and control room temperature in both the heating and air conditioning modes. The thermostat is designed to maintain $\pm 2^\circ\text{F}$ accuracy. No batteries are required; temperature, fan, mode, and installer configuration settings are preserved with power off.

INSTALLATION CONSIDERATIONS

A. Air Conditioner Model

TSTATBBBAC01-B, the Builder's Model air conditioner thermostat, may be wired with or without connecting a common wire between the indoor equipment and the thermostat. However, it is recommended to use a common wire whenever possible. Without a common wire this thermostat becomes "power stealing." This means it will need to steal a small amount of power from the equipment to which it is connected. When "power stealing" method is used, the supplied 270 ohm load resistor must be connected at the indoor unit. (See Fig. 2, 3, 5, and notes.)

NOTE: Not all HVAC equipment is compatible with power stealing type thermostats. For all non-Bryant equipment, consult the system equipment Installation Instructions before applying this thermostat in a power stealing manner.

367A, 369A	
349MAV	Gas Furnace
TSTATXNCNV10	Thermostat Conversion Kit

B. Heat Pump Model

TSTATBBBHP01-B, the Builder's Model heat pump thermostat, is compatible with all Bryant heat pump systems. It is **NOT** power stealing and **MUST** have both the R and C terminals connected to operate properly. This thermostat uses a green LED to indicate auxiliary heat and emergency heat operation.

I. THERMOSTAT LOCATION

Thermostat should be mounted:

- Approximately 5 ft (1.5m) from floor.
- Close to or in a frequently used room, preferably on an inside partitioning wall.
- On a section of wall without pipes or duct work.

Thermostat should **NOT** be mounted:

- Close to a window, on an outside wall, or next to a door leading to the outside.
- Exposed to direct light and heat from a lamp, sun, fireplace, or other heat-radiating object which may cause a false reading.
- Close to or in direct airflow from supply registers and return-air grilles.
