A New Kind of Bleak Owen Hatherley, 2013-04-09 This is what austerity looks like a nation surviving on the results of what conservatives privately call the progressive nonsense of the Big Society agenda In a journey that begins and ends in the capital but takes in Belfast Aberdeen Plymouth and Brighton Hatherley explores modern Britain's urban landscape and finds a short sighted disarray of empty buildings malls and glass towers Yet while *A New Kind of Bleak* anatomizes broken Britain Hatherley also looks to a hopeful future and discovers fragments of what it might look like Illustrated by Laura Oldfield Ford author and artist of *Savage Messiah*

A New Kind of Bleak: Journeys Through Urban Britain Owen Hatherley, 2012-07-31 An anatomy of failed state Britain by the author of *A Guide to the New Ruins of Great Britain* In *A Guide to the New Ruins of Great Britain* Owen Hatherley skewered New Labour's architectural legacy in all its witless swagger Now in the year of the Diamond Jubilee and the London Olympics he sets out to describe what the Coalition's altogether different approach to economic mismanagement and civic irresponsibility is doing to the places where the British live In a journey that begins and ends in the capital Hatherley takes us from Plymouth and Brighton to Belfast and Aberdeen by way of the eerie urbanism of the Welsh valleys and the much mocked splendour of modernist Coventry Everywhere outside the unreal Southeast the building has stopped in towns and cities which languish as they wait for the next bout of self defeating austerity Hatherley writes with unrivalled aggression about the disarray of modern Britain and yet this remains a book about possibilities remembered about unlikely successes in the midst of seemingly inexorable failure For as well as trash ancient and modern Hatherley finds signs of the hopeful country Britain once was and hints of what it might become

Paradoxical Urbanism Malcolm Miles, 2020-09-05 Modernist urbanism seems progressive even Utopian design for a better world through a democratic and humane built environment But two currents undermine this vision from within an Arcadianism which turns to a rural idyll as retreat from change and the effects of industrialization and an instrumentalism by which the humane vision becomes prescriptive and anti democratic Malcolm Miles argues that these two currents undermine modernism's progressive vision This book examines the roots of modernist urbanism in the seamless self contained systems of Cartesian space and identifies contradictions within modernist urbanism in its instrumentalism and reliance on de politicised professional expertise Miles adroitly reviews the postmodern culture of industrial ruins and posits that if cities are to be places of proximity diversity mobility and agency this will require a

move from modernist instrumentalism to a creative and radically democratic co production of the built environment

makers in urban development **The Labour Party, Housing and Urban Transformation** Phil Child, 2024-05-16 The Labour Party Housing and Urban Transformation explores how the urban transformation of Britain between 1945 and 1970 was understood politically by the Labour Party Placing the Labour Party at the centre of the discussion the book covers the most extensive period of state led urban change in British history from the end of the Second World War to the decline of high modernism in the late 1960s Taking a particular focus on housing to explore the implementation of modernist ideas to drive a far ranging process of urban transformation in Britain it challenges conventional understandings of Labour's urban legacy and puts political ideas at the heart of twentieth century change Utilising a breadth and range of material including two distinct sets of archival sources published secondary material national legislation and Housing Acts and various case studies Child moves seamlessly between the national picture and its local impacts It also draws from sources which had a crucial influence on political thinking throughout the mid twentieth century to understand how urban transformation represented for Labour a political vision of the future A timely contribution both to urban history and to the history of post war Britain it challenges existing interpretations of modernism connects urban change to the political ideas that drove it and allows us to comprehend the state of urban Britain today *Community Green* David Nichols, Robert Freestone, 2024-02-06 Neighbourhood open space ranks highly as a key component in suburban liveability assessments originating from the development of urban planning as a profession and the proliferation of the garden suburb Community Green uniquely connects the past present and future of planning for small open spaces around the narrative of internal reserves The distinctive planned spaces are typically enclosed on every side hidden within residential blocks serving as local pocket parks and reflecting the evolving values of community life from the garden city movement to contemporary new urbanism This book resuscitates the enclosed almost secretive reserve from history as a distinctive form of local open space whose problems and potentialities are relevant to many other green community spaces In so doing it opens up even wider connections between localism and globalism the past and the future and for connecting community initiatives to broader global challenges of cohesion health food and climate change This fully illustrated book charts the outcomes and implications of this evolution across several continents injecting human stories of civic initiatives struggles and triumphs along the way Community Green will be of interest to a wide readership interested in studying managing and improving the quality of all small open spaces in the urban landscape **Topothesia** Ameeth Vijay, 2023-05-02 SHORTLISTED 2024 MSA FIRST BOOK PRIZE Topothesia reads urban planning as a mode of speculative fiction one inextricably linked to histories of British colonialism and liberalism through a particular understanding of place The book focuses on town planning from the late nineteenth century to the present day showing how the contemporary geography of Britain sharply unequal and marked by racial division continues ideologies of place established in colonial contexts Specifically planning allows for the speculative construction of future places that are both utopian in their ability to resolve political disagreement and at the same

tantalizingly realizable able to be produced in concrete reality This speculative imaginary I argue is only possible within the ideological framework of colonialism and the history of empire within which it developed Topothesia refers to a rhetorical device employing the vivid depiction of an often imaginary place This device Vijay shows helps us understand urban planning as a narrative genre one that even in its most mundane documents is compelled to produce elaborate fantasies of future places The book examines specific planning movements over time to understand the form and the stakes of their speculative worlds In building these worlds the book shows planners continually coopted literary critiques of the present and reveries of the future retaining literature s aesthetics while eschewing its politics At the same time Vijay shows writers and artists have dwelled within and against these colonial imaginaries to seek other means of representing place
