Red Like No Other - how Cochineal Colored the World Carmella Padilla, 2015 **A Red Like No Other** Carmella Padilla, 2015 *Eighteenth-Century Art Worlds* Michael Yonan, Stacey Sloboda, 2019-02-21 While the connected international character of today's art world is well known the eighteenth century too had a global art world *Eighteenth Century Art Worlds* is the first book to attempt a map of the global art world of the eighteenth century Fourteen essays from a distinguished group of scholars explore both cross cultural connections and local specificities of art production and consumption in Africa the Americas Asia and Europe The result is an account of a series of interconnected and asymmetrical art worlds that were well developed in the eighteenth century Capturing the full material diversity of eighteenth century art this book considers painting and sculpture alongside far more numerous prints and decorative objects Analyzing the role of place in the history of eighteenth century art it bridges the disciplines of art history and cultural geography and draws attention away from any one place as a privileged art historical site while highlighting places such as Manila Beijing Mexico City and London as significant points on globalized map of the eighteenth century art world *Eighteenth Century Art Worlds* combines a broad global perspective on the history of art with careful attention to how global artistic concerns intersect with local ones offering a framework for future studies in global art history A Revolution in Colour Giorgio Riello, Maria Hayward, Ulinka Rublack, 2024-09-19 This major volume aims to re-colour the European world of dress c 1300 1800 New dyes created one of the most important visual experiences of the period yet their story has been side-lined by a focus on visual experiences shaped by the high arts Meanwhile theatrical productions and period films still abound with broad assumptions about the growing dominance of black clothing for elites during the period while ordinary people are imagined having worn coarse greys and bleached garments This volume presents clear evidence that even the clothing of the middle classes could be much more expensive than paintings and that coloured clothing and accessories were ubiquitous across society Contributors shed new light on the economic environmental and cultural dimensions of colour in dress The range of dyes expanded considerably in the sixteenth and seventeenth centuries drawing on Asian and Mediterranean knowledge new collections of recipes and the greater diversity of plants available through New World trade Working creatively with organic plant animal and mineral materials to make colours involved considerable knowledge pleasure and skill The creation of colour through dyes thus reveals a whole range of global agricultural and craft technologies that can inspire future material worlds and transforms our understanding of Europe's cultural heritage **Colours, Commodities and the Birth of Globalization** Carlos Marichal, David Pretel, 2024-08-22 This volume explores the global history of natural dyes from the Americas and asks how their production and trade have shaped globalisation since early modern times From their extraction and processing to

their overseas trade it shows how this commodity contributed to the rise of the textile industry and consumption in Europe the United States and Latin America In doing so it sheds new light on the emergence of a global economy Spanning several centuries Colours Commodities and the Birth of Globalization takes the reader from 1500 through the industrial revolutions of Europe and the United States and culminates in the synthetic age of the late 19th and early 20th centuries Ranging from the indigo trade in the Atlantic to the secrets of the Indian production of cochineal the chapters in this collection transcend nationally bounded historical narratives and explore transoceanic dynamics imperial ambitions and the cross cultural exchange of knowledge and techniques to better understand the birth of globalization Materia Americana Gabriela Siracusano, Agustina Rodríguez Romero, 2025-05-02 The studies on American artistic production in viceregal times have revolved since their beginnings around the problem of style meaning or attribution among others In recent years hand in hand with a look more attentive to social and cultural issues and to interdisciplinary intersections an inquiry into the materiality of these objects has appeared as unavoidable In this sense Materia Americana is a book that for the first time brings together the research of leading art historians chemists physicists curators and museologists concerned with Spanish American art and purports to become a reference book for future works on the subject
