National Artificial Intelligence Research Resource Task Force Releases Final Report

Today, the National Artificial Intelligence Research Resource (NAIRR) Task Force released its final report, a roadmap for standing up a national research infrastructure that would broaden access to the resources essential to artificial intelligence (AI) research and development.

While AI research and development (R&D) in the United States is advancing rapidly, opportunities to pursue cutting-edge AI research and new AI applications are often inaccessible to researchers beyond those at well-resourced companies, organizations, and academic institutions. A NAIRR would change that by providing AI researchers and students with significantly expanded access to computational resources, high-quality data, educational tools, and user support—fueling greater innovation and advancing AI that serves the public good.

“AI advances hold tremendous promise for tackling our hardest problems and achieving our greatest aspirations,” said **Arati Prabhakar, OSTP Director and Assistant to the President for Science and Technology**. “We will only realize this potential when many more kinds of researchers have access to the powerful capabilities that underpin AI advances.”

“Democratizing access to the cyberinfrastructure that fuels AI research and development will enable all of America’s diverse AI researchers to participate in exploring innovative ideas for advancing AI, including communities, institutions, and regions that have been traditionally underserved,” said **NSF Director Sethuraman Panchanathan**. “By creating an equitable cyberinfrastructure for cutting-edge AI that builds on-ramps for participation for a wide range of researchers and communities, the NAIRR could build AI capacity across the nation and support responsible AI research and development, thereby driving innovation and ensuring long-term U.S. competitiveness in this critical technology area.”

“OSTP’s work on AI, including the development of an updated National AI R&D Strategic Plan and the Blueprint for an AI Bill of Rights, is intended to maximize its benefits, while ensuring that AI-driven systems do not harm Americans’ rights or freedoms,” said **Deputy Assistant to the President and Principal Deputy U.S. Chief Technology Officer Alexander Macgillivray**. “We are excited about the release of the Task Force’s report

Communicating Science and Engineering Data in the Information Age National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Communicating National Science Foundation Science and Engineering Information to Data Users, 2012-02-07 The National Center for Science and Engineering Statistics NCSES of the National Science Foundation NSF communicates its science and engineering S E information to data users in a very fluid environment that is undergoing modernization at a pace at which data producer dissemination practices protocols and technologies on one hand and user demands and capabilities on the other are changing faster than the agency has been able to accommodate NCSES asked the Committee on National Statistics and the Computer Science and Telecommunications Board of the National Research Council to form a panel to review the NCSES communication and dissemination program that is concerned with the collection and distribution of information on science and engineering and to recommend future directions for the program Communicating Science and Engineering Data in the Information Age includes recommendations to improve NCSES s dissemination program and improve data user engagement This report includes recommendations such as NCSES s transition to a dissemination framework that emphasizes database management rather than data presentation and that NCSES analyze the results of its initial online consumer survey and refine it over time The implementation of the report s recommendations should be undertaken within an overall framework that accords priority to the basic quality of the data and the fundamentals of dissemination then to significant enhancements that are achievable in the short term while laying the groundwork for other long term improvements

Oversight on OSTP United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Science, Technology, and Space, 1979 *The American Lab* C. Bruce Tarter, 2018-08 In The American Lab former LLNL director Bruce Tarter captures the spirit of the Laboratory and its reflection of the broader

world in which it thrived He identifies the major themes that have characterized science and technology in the latter half of the twentieth century the growth and decline of nuclear warheads the unprecedented rise of supercomputing technology laser systems fusion and mass spectrometry He illuminates the Cold War dynamic from the participants point of view an unusual and valuable perspective on nuclear history The story of the laboratory is a tale of three eras Although the Lab took its research vision from European Edward Teller its modus operandi came almost exclusively from namesake Ernest Lawrence and was subsequently invented in house by its scientists and staff During its first two decades the Lab s focus was almost entirely on nuclear weapons research and development with a few other smaller enterprises that were technically related to the nuclear weapons activities In the 1970s and 1980s the Laboratory along with many others in the Department of Energy complex expanded into civilian pursuits that included energy environment biology and basic science A major program in laser science and technology became a cornerstone of this period The third era was initiated by the end of the Cold War and saw the transformation of the traditional nuclear weapons activities into the stockpile stewardship program along with the rapid growth of projects that can be broadly characterized as homeland security Tarter s history memoir of the Lawrence Livermore National Laboratory provides an insider s examination of nuclear science in the Cold War and the technological shift that occurred after the fall of the Berlin Wall Provided by publisher *Public Utilities Fortnightly* ,1990 **Scientific American** ,1990 Monthly magazine devoted to topics of general scientific interest *Energy Research Abstracts* ,1990
