A Right To Housing Foundation For A New Social Agenda:

A Right to Housing Rachel Bratt, Michael Stone, Chester Hartman, 2006-02-15 How can we explain the persistent inability of the United States to meet the housing needs of a large portion of its people What can we do about the problem In this important new work leading progressive housing activists and thinkers examine the state of housing the housed and housing policy in the United States and then provide a comprehensive and detailed program for solving the problem under the goal of a Right to Housing

The Affordable Housing Reader Elizabeth J. Mueller, J. Rosie Tighe, 2013-03-05 The Affordable Housing Reader brings together classic works and contemporary writing on the themes and debates that have animated the field of affordable housing policy as well as the challenges in achieving the goals of policy on the ground The Reader aimed at professors students and researchers provides an overview of the literature on housing policy and planning that is both comprehensive and interdisciplinary It is particularly suited for graduate and undergraduate courses on housing policy offered to students of public policy and city planning The Reader is structured around the key debates in affordable housing ranging from the conflicting motivations for housing policy through analysis of the causes of and solutions to housing problems to concerns about gentrification and housing and race Each debate is contextualized in an introductory essay by the editors and illustrated with a range of texts and articles Elizabeth Mueller and Rosie Tighe have brought together for the first time into a single volume the best and most influential writings on housing and its importance for planners and policy makers

Noguera Alice O Connor Mary Pattillo Janet Smith Nik Theodore Elizabeth S Todd Breland Stephanie Truchan and Rachel Weber **The Oxford Handbook of Urban Economics and Planning** Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics *Manufactured Insecurity* Esther Sullivan, 2018-08-07 *Manufactured Insecurity* is the first book of its kind to provide an in depth investigation of the social legal geospatial and market forces that intersect to create housing insecurity for an entire class of low income residents Drawing on rich ethnographic data collected before during and after mobile home park closures and community wide evictions in Florida and Texas the two states with the largest mobile home populations *Manufactured Insecurity* forces social scientists and policymakers to respond to a fundamental question how do the poor access and retain secure housing in the face of widespread poverty deepening inequality and scarce legal protection With important contributions to urban sociology housing studies planning and public policy the book provides a broader understanding of inequality and social welfare in the United States today *What We See* Stephen A. Goldsmith, Lynne Elizabeth, 2010-05-01 Leading thinkers offer fresh insight into the workings of vibrant ecological equitable communities and their economies **Urban Politics** Bernard H. Ross, Myron A. Levine, 2015-07-17 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development A new chapter on globalization and its impact on cities brings the history of urban development up to date and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local

arena The eighth edition is significantly shorter than previous editions and the entire text has been thoroughly rewritten to engage students Boxed case studies of prominent recent and current urban development efforts provide material for class discussion and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics

Sustaining Cities Linda Krause, 2012-12-14 What has happened to cities after the global economic recession *Sustaining Cities* answers this question by explaining how failed governmental policies contributed to urban problems and offering best practices for solving them From social scientists and urban planners to architects and literary and film critics the authors of this unique collection suggest real responses to this crisis Could the drastic declines in housing markets have been avoided Yes if we reframe our housing values Do you want to attract corporate investment to your town You might want to think twice about doing so The extinction of the Celtic Tiger may be charted in statistics but the response in popular Irish mystery novels is much more compelling China while not immune to market vicissitudes still booms but at a considerable cost to its urban identities Whether constructing a sustainable social framework for Mexican mega cities or a neighborhood in London these nine essays consider some strikingly similar strategies And perhaps as the contributors suggest it's time to look beyond the usual boundaries of urban suburban and exurban to forge new links among these communities that will benefit all citizens Accessible to anyone with an interest in how cities cope today *Sustaining Cities* presents a cautionary tale with a hopeful ending

New York for Sale Tom Angotti, 2011-02-25 How community based planning has challenged the powerful real estate industry in New York City Remarkably grassroots based community planning flourishes in New York City the self proclaimed real estate capital of the world with at least seventy community plans for different neighborhoods throughout the city Most of these were developed during fierce struggles against gentrification displacement and environmental hazards and most got little or no support from government In fact community based plans in New York far outnumber the land use plans produced by government agencies In *New York for Sale* Tom Angotti tells some of the stories of community planning in New York City how activists moved beyond simple protests and began to formulate community plans to protect neighborhoods against urban renewal real estate mega projects gentrification and environmental hazards Angotti both observer of and longtime participant in New York community planning focuses on the close relationships among community planning political strategy and control over land After describing the political economy of New York City real estate its close ties to global financial capital and the roots of community planning in social movements and community organizing Angotti turns to specifics He tells of two pioneering plans forged in reaction to urban renewal plans including the first community plan in the city the 1961 Cooper Square Alternate Plan a response to a Robert Moses urban renewal scheme struggles for environmental justice including battles over incinerators sludge and garbage plans officially adopted by the city and plans dominated by powerful real estate interests Finally Angotti proposes strategies for progressive inclusive community planning not only for New York City but for anywhere that neighborhoods want to protect themselves and their land *New York for Sale* teaches the

empowering lesson that community plans can challenge market driven development even in global cities with powerful real estate industries
