The Adolescent Alone Jeffrey Blustein, Carol Levine, Nancy Dubler, 1999-07-13 A growing number of adolescents do not have a supportive and trusting relationship with an adult in a birth foster adoptive or chosen family Through a variety of circumstances they are literally or functionally alone Yet like all adolescents they need routine and sometimes specialized health care This book is a collection of essays case studies and guidelines that describe the demography philosophical medical legal and developmental framework in which these youth and health care staff confront medical decision making The authors address questions of consent confidentiality access to care and the right to refuse or demand care Throughout the emphasis is on the real world experience of adolescents as they struggle to overcome the challenges of being alone Professionals who work with these adolescents cannot replace their absent or disinterested families but can fulfill the critical role of trusted adult advisor

Understanding Early Adolescent Self and Identity Thomas M. Brinthaup, Richard P. Lipka, 2012-02-01 What are the major self and identity concerns for early adolescents What are the applications and interventions that can address those concerns helping to ease the transition into later adolescence and adulthood Providing a broad and interdisciplinary approach to studying the self the contributors emphasize the practical implications of their work

for understanding early adolescent self and identity and for designing interventions that facilitate development and adjustment The book consists of four major sections in which contributors address conceptual issues school transitions peer and behavioral problems and intervention programs *The Adolescent in Family Therapy* Joseph A. Micucci, 2009-07-20 Rich with clinical wisdom this successful text and practitioner guide offers a comprehensive framework for treating adolescent problems in the family context Even as teenagers become increasingly independent Joseph Micucci shows they still need parental guidance and nurturance By strengthening family relationships clinicians can alleviate symptoms and promote behavioral change Vivid examples and session transcripts illustrate specific strategies for treating eating disorders depression anxiety defiance underachievement and other frequently encountered challenges Weaving together family therapy techniques with ideas from psychodynamic and cognitive behavioral approaches the book has a pragmatic focus on effective interventions for getting adolescent development back on track New to This Edition Thoroughly updated to reflect current research and reader feedback Chapter on adolescent anxiety disorders Expanded coverage of attachment issues lesbian gay and bisexual youth and racial and ethnic identity New case material one of the book's most popular features

Pathways Through Adolescence Lisa J. Crockett, Ann C. Crouter, 2014-03-05 Adolescent researchers are increasingly aware that they must examine development both across time and across context To do so however requires new conceptualizations and methodological approaches to the study of development including attention to the pathways young people choose in adolescence and follow into adulthood This volume assembles work by key researchers in the field who are struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period A complete understanding of developmental pathways requires the recognition that adolescents' social contexts family school neighborhood and or peer group are important influences on the choices they make at this developmental period Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and their implications for adolescent development The present volume seeks to address this gap in the literature with attention given not only to the interrelationships among contexts for white middle class youth but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources It concludes with an examination of researcher community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems facing youth in their community and as a means to promote potential avenues for policy change and intervention
