

**1 Inspect**

Inspect the UPS and its accessories for damage:

- User's Manual • UPS • Cordage (2)
- Telephone cable • Warranty card
- APC Software register
- Equipment Protection policy

**500 and 650 VA models:**

- PowerChute® plus software (CD)
- Serial cable
- Software Serial Sheet

The packaging is recyclable, send it to a recycler or dispose of it properly. Please fill out the warranty registration card to obtain warranty coverage.

**2 Place**

Locate the UPS in a protected area due to fire or excessive dust and low relative air flow. Do not operate the UPS where the fire protection and humidity is outside specifications.

**3 Connect UPS to power****Connect the battery**

Refer to "Battery replacement procedure" on pg. 2

**Charge the battery**

The UPS battery charges whenever it is connected to utility power and typically requires less than four hours to charge fully. UPS capacity is reduced until the battery is fully charged.

**4 Check site wiring fault indicator (rear panel-top)**

A site indicator measures the check board error due to faulty building wiring. It should be in commodity a qualified electrician.

If the building wiring fault indicator is in, one of the following conditions exist:

- Open or high resistance ground
- Hot and neutral polarity reversal
- Overloaded neutral circuit

**Note:** Improper building wiring will prevent the UPS from operating. It will limit its protection capability. Faulty building wiring could result in equipment damage that is not covered by APC. Please refer to APC's Equipment Protection Policy for details.

**5 Connect equipment**

**Grounding:** Surge protection is provided for surge protection. Surge protection is provided for surge protection.

**Battery Back-Up Outlets:**

- Surge protection when utility power is used
- Battery power and surge protection when utility voltage is outside acceptable limits

Data-sensitive equipment such as a computer, modem, or external drive are connected to these outlets.

**Accessory Surge Protection Outlets (500 and 650 VA models only):**

These outlets are for equipment that need surge protection from the wall power during a utility outage. (Do not plug printer or a modem).

**Block/No-Plug Outlets (500 and 650 VA models only):** Corded outlets are provided which accept "block-type" plugs without covering other outlets. Some printers and external disk drives have block-type plugs that look similar to the one below.

**Caution:** Do not connect a surge protector or surge protector to the UPS. These devices may overload the UPS.

**6 Connect phone cables to surge protection (optional)****Socket Location:**

Rear panel of 300 and 650 VA models only.

Surge protection is provided for one phone line when it is connected as shown below.

**7 Switch "On" and test the UPS**

Press the upper portion of the Power I/O switch and then switch "On" the equipment connected to the UPS. The Power I/O switch should be in. Utility power is supplied to the equipment.

Perform a simulated utility black-out to verify the UPS can switch from utility power to battery power and back again, without affecting equipment powered by the UPS.

**Connected equipment must be "On".**

*Continued*

**7 Continued**

Switch the test by either:

- Unplugging the UPS power cord, or
- Pressing and holding the "Test" portion of the Test/Alarm Disable switch (500 and 650 VA models only).

1. The UPS will then begin recovery five seconds later continuously to a normal power state. Your equipment is powered by a limited capacity power source.

2. Restore power to the UPS by releasing the Test switch or by reconnecting the UPS power cord.

If the equipment operation was unaffected throughout the testing, the system is operating properly.

**8 Connect computer interface cable (optional)****Socket Location:**

Rear panel of UPS

**Note:** 300 VA model serial port pins are not used and cable separately. Call APC at the number listed at the bottom of Page 2, and ask for software for AP901.5.

Connect the interface cable to the computer interface port on the rear panel of the UPS. Connect the other end of the cable to the serial port on the computer and install the PowerChute plus software (see software documentation for detailed instructions).

**UPS Controls****Power I/O Switch**

The Power I/O Switch controls power to the UPS.

**Lease:** The lamp in the Power I/O Switch is in whenever normal utility voltage is present at the power socket.

- 1. The UPS operates and all connected devices are powered.
- 2. The UPS is also recognized and all devices connected to battery backup outlets are supported.

All devices connected to battery backup outlets can be switched "On" or "Off" using this switch. If one's device's power switch is in the "On" position.

**Note:** Accessory surge protected outlets are unaffected by this switch—they remain powered as long as utility power is available.

**Test/Alarm Disable Switch**

**Switch Location:** Front panel of 300 and 650 VA models only.

The battery maintenance is checked by pressing and holding the "Test" switch and waiting at least five seconds. The UPS provides power to the equipment before the low battery warning is sounded.

**Test**

Press the "Test" portion of the Test/Alarm Disable Switch to simulate a power outage - the UPS battery supplies power to the equipment.

**Alarm Disable**

The UPS will initiate a beep recovery five seconds during a utility power outage, unless the alarm is disabled by pressing the side of the switch. The UPS low battery warning (a loud continuous tone) will sound in the event of an extended utility outage.

Commerce Business Daily ,1998-03      Acoustical Imaging Sydney Lees,Leonard A. Ferrari,2012-12-06 The contents of this volume are the proceedings of the 23 d International Symposium on Acoustical Imaging which took place 13 16 April 1997 in Boston Massachusetts The first Symposium met 25 years ago Originally the Symposium met in California then elsewhere within the United States but beginning in 1988 the Symposia began to meet outside of the United States as well It is now being held about every eighteen months alternately in the United States and then outside The present pattern is to hold one meeting in East Asia then in the USA then in Europe and again in the USA However for scheduling reasons the next Symposium will be in Santa Barbara California followed by England and then East Asia It is to be noted that the Symposium is a free standing institution not associated with any other organization Each meeting is the total responsibility of its chairman with the advice of past chairmen Papers are submitted in response to the call for them and reviewed by an International Scientific Advisory Board The quality depends entirely on the response to the call It is gratifying to note that the Symposium has attained the status that attracts high quality contributions despite or perhaps because of the loose structure Two factors that have appeal are that there is only one session and that there is time during the meeting for extensive discussion      British National Bibliography for Report Literature ,2000-03      **Hospital Medicine** ,2003
