A Place On Earth A Novel:

Virtues of Renewal Jeffrey Bilbro, 2018-12-14 For over fifty years Wendell Berry has argued that our most pressing ecological and cultural need is a renewed formal intelligence a mode of thinking and acting that fosters the health of the earth and its beings Yet the present industrial economy prioritizes a technical self centered way of relating to the world that often demands and rewards busyness over thoughtful observation independence over relationships and replacing over repairing Such a system is both unsustainable and results in destructive far reaching consequences for our society and land In *Virtues of Renewal* Wendell Berry's Sustainable Forms Jeffrey Bilbro combines textual analysis and cultural criticism to explain how Berry's literary forms encourage readers to practice virtues of renewal While the written word alone cannot enact change Bilbro asserts that Berry's poetry essays and fiction can inspire people to as Berry writes practice resurrection Bilbro examines the distinct yet symbiotic features of these three genres demonstrating the importance of the humanities in supporting tenable economies He uses Berry's pieces to suggest the need for more robust language for discussing conservation ecology and the natural and regenerative process of death Bilbro additionally translates Berry's literature to a wider audience putting him in conversation with philosophers and theologians such as Ivan Illich Willie Jennings Charles Taylor and Augustine The lessons that Berry and his work have to offer are not only for those interested in cultivating the land but also for those who cultivate their communities and live mindfully In short these lessons are pertinent to all who are willing to make an effort to live the examined life Such formative work is not dramatic or quick but it can foster the deep and lasting transformation necessary to develop a more sustainable culture and economy *Run to Earth; A Novel, In Two Volumes* M. E. Braddon, 2025-08-31 Reproduction of the original The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage *A Place on Earth* Wendell Berry, 1983 *Heaven is a Place on Earth* Adrian Shirk, 2023-12-05 An exploration of American ideas of utopia through the lens of one millennial's quest to live a more communal life under late stage capitalism Told in a series of essays that balance memoir with fieldwork *Heaven Is a Place on Earth* is an idiosyncratic study of American utopian experiments from the Shakers to the radical faerie communes of Short Mountain to the Bronx rebuilding movement through the lens of one woman's quest to create a more communal life in a time of unending economic and social precarity When Adrian Shirk's father in law has a stroke and loses his ability to speak and walk she and her husband both adjuncts in their midtwenties become his primary caretakers The stress of these new responsibilities coupled with navigating America's broken health care system and ordinary twenty first century financial insecurity propels Shirk into an odyssey through the history and present of American utopian experiments in the hope that they might offer a way forward Along the way Shirk seeks solace in her own community of friends artists and theologians They try to imagine a different kind of life examining what might be replicable within the histories of utopia making and what

might be doomed Rather than no place Shirk reframes utopia as something that according to the laws of capital and conquest shouldn't be able to exist but does anyway if only for a moment

Environments in Science Fiction Susan M. Bernardo, Donald E. Palumbo, C.W. Sullivan III, 2014-03-26 The all new essays in this book respond to the question

How do spaces in science fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two
