A Question Of Identity Women Science And Literature:

A Question of Identity Marina Benjamin, 1993 *Women Science and Literature* **Through a Glass Darkly. Women in the Scientific Elite** Izolda Takács, 2022 The primary goal of this book is to present the career paths of female academics and doctors of science to show gender stereotypes that still exist among scientists and to explore the factors that have helped and hindered them in their careers In addition the aim is to show whether any inhibitory factors had aspects that can be traced back to gender discrimination as well as how doctors of science and or academics of the Hungarian Academy of Sciences have managed to overcome the obstacles posed by traditional gender roles Furthermore the book also deals with general issues relating to the role of women in society Therefore a chapter is included which examines the equalities between women and men as fundamental human rights and highlights the general philosophical issues of gender inequality and the origins of binary oppositions as well as the problems of gender bias in the workplace and organisational climate The book is addressed to both professional audiences as well as anyone wishing to have an overview of new approaches to the questions and problems mentioned above

Geography, Science and National Identity Charles W. J. Withers, 2001-10-04 Charles Withers book brings together work on the history of geography and the history of science with extensive archival analysis to explore how geographical knowledge has been used to shape an understanding of the nation Using Scotland as an exemplar the author places geographical knowledge in its wider intellectual context to afford insights into perspectives of empire national identity and the geographies of science In so doing he advances a new area of geographical enquiry the historical geography of geographical knowledge and demonstrates how and why different forms of geographical knowledge have been used in the past to constitute national identity and where those forms were constructed and received The book will make an important contribution to the study of nationhood and empire and will therefore interest historians as well as students of historical geography and historians of science It is theoretically engaging empirically rich and beautifully illustrated

Encyclopedia of Literature and Science Pamela Gossin, 2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they re different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers

world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading *Literature and Science, 1660-1834, Part I. Secrecy and Disclosure in Victorian Fiction Leila Silvana May,2016-07-15 Why were the Victorians more fascinated with secrecy than people of other periods What is the function of secrets in Victorian fiction and in the society depicted how does it differ from that of other periods and how did readers of Victorian fiction respond to the secrecy they encountered These are some of the questions Leila May poses in her study of the dynamics of secrecy and disclosure in fiction from Queen Victoria s coronation to the century s end May argues that the works of writers such as Charlotte Bront William Makepeace Thackeray Mary Elizabeth Braddon Edward Bulwer Lytton and Arthur Conan Doyle reflect a distinctly Victorian obsession with the veiling and unveiling of information She argues that there are two opposing vectors in Victorian culture concerning secrecy and subjectivity one presupposing a form of radical Cartesian selfhood always remaining a secret to other selves and another showing that nothing can be hidden from the trained eye May calls the relation between these clashing tendencies the dialectics of secrecy and disclosure May s theories of secrecy and disclosure are informed by the work of twentieth century social scientists She emphasizes Georg Simmel s thesis that sociality and subjectivity are impossible without secrecy and Erving Goffman s claim that sociality can be understood in terms of performativity the presentation of the self in everyday life and his revelation that performance always involves disguise hence secrecy May s study offers convincing evidence that secrecy and duplicity in contrast to the Victorian period s emphasis on honesty and earnestness emerged in response to the social pressures of class gender monarchy and empire and were key factors in producing both the subjectivity and the sociality that we now recognize as Victorian
