A Place In The Shade Charles Correa:

A Place in the Shade Charles Correa, 2010 Indian cities are mechanisms for social engineering more powerful than anything we have seen before They will transform this country A Place in the Shade explores architectural and urban issues in India from the house as a machine for dealing with our often hostile climate to the metaphysical role of architecture as a Model of the Cosmos This reflective provocative and consistently readable collection of essays argues that our habitat must respond to the overriding parameters of climate culture and financial resources and that our physical environment should accommodate notions of inclusion and diversity and that priceless quality of synergy which characterizes a city Charles Correa identifies the defining issues of the urbanization process that is so rapidly transforming India He writes You cannot look at cities without wandering into architecture on the one hand and politics on the other Tragically over the last few decades urban real estate has become the primary source of financing for political parties and the politicians who run them But our towns and cities are assets too precious to be squandered in this manner Like the wheat fields of Punjab and the coal fields of Bihar cities are a crucial part of our national wealth Their success or their failure will determine our future Indian cities are mechanisms for social engineering more powerful than anything we have seen before They will transform this country A Place in the Shade explores architectural and urban issues in India from the house as a machine for dealing with our often hostile climate to the metaphysical role of architecture as a Model of the Cosmos

The ineffable in Charles Correa Edoardo Narne, 2021-11-18 Charles Correa seen by many in India as a sort of guru as someone capable to transcend and grasp the ineffable reality that surrounds us has left his noteworthy architectural heritage across the globe In 2013 the Royal Institute of British Architects RIBA celebrated him as one of the greatest contemporary urban planners showcasing his work in an exhibition called Charles Correa India's greatest architect Profoundly tied to my Indian origins to me Correa has been the master over distance a personal benchmark to set my goals against He was my inspiring thinker architect and urbanist or simply said the designer I would have liked to be Many of Correa's last works show his deep rooted search of the highest spiritual dimension in the attempt to trap part of the cosmic energy surrounding us into architectural works that were and are the shadow of his soul

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to

material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies

The Oxford Handbook of Ethics of AI

Markus D. Dubber, Frank Pasquale, Sunit Das, 2020-06-30 This volume tackles a quickly evolving field of inquiry mapping the existing discourse as part of a general attempt to place current developments in historical context at the same time breaking new ground in taking on novel subjects and pursuing fresh approaches The term AI is used to refer to a broad range of phenomena from machine learning and data mining to artificial general intelligence The recent advent of more sophisticated AI systems which function with partial or full autonomy and are capable of tasks which require learning and intelligence presents difficult ethical questions and has drawn concerns from many quarters about individual and societal welfare democratic decision making moral agency and the prevention of harm This work ranges from explorations of normative constraints on specific applications of machine learning algorithms today in everyday medical practice for instance to reflections on the potential status of AI as a form of consciousness with attendant rights and duties and more generally still on the conceptual terms and frameworks necessarily to understand tasks requiring intelligence whether human or AI

Abundance Not Capital Angelika Fitz, Elke Krasny, Architekturzentrum Wien, 2025-08-26 What if architecture were not an instrument of capital How to imagine and build a non extractivist and non exploitative architecture Capital s voracious appetite forces architecture into a regime of never enough The current realities of building involve extraction and exploitation which in turn cause climate breakdown environmental ruin alienated labor conditions and the destruction of local construction knowledge But what if we could do architecture differently What does non extractivist architecture look like In this book Angelika Fitz and Elke Krasny introduce the concept of abundance to call for a paradigm shift in architecture Using as its example the exceptional work of architect Anupama Kundoo this book shows that non extractivist and non exploitative architecture is undeniably possible Kundoo born in Pune India weaves together innovative technological experimentation and traditional crafts With careful consideration of local resources building skills climate and environment she makes buildings that embody spatial beauty and graceful materiality *Abundance Not Capital* is a manifesto for creating a future forward alternative architecture Contributors Shumi Bose Jordan Carver Peggy Deamer Madhavi Desai Angelika Fitz Rupali Gupte Ranjit Hoskote Elke Krasny Charlotte Malterre Barthes Shannon Mattern and Laurie Parsons Copublished with Architekturzentrum Wien

Cartographies rethinks medical and design pedagogies in the context of both the Affective and Digital Turns that are occurring under the umbrella of New Materialism This collection is framed through Deleuze's symptomological approach which creates the ideal terrain for architecture and medical technologies of care to meet with robotics alongside the newly emerging materialist landscape **LabOratory** Sandra Kaji-O'Grady, Chris L. Smith, 2024-02-06 An illustrated examination of laboratory architecture and the work that it does to engage the public recruit scientists and attract funding The laboratory building is as significant to the twenty first century as the cathedral was to the thirteenth and fourteenth centuries The contemporary science laboratory is built at the grand scales of cathedrals and constitutes as significant an architectural statement The laboratory is a serious investment in architectural expression in an attempt to persuade us of the value of the science that goes on inside In this lavishly illustrated book Sandra Kaji O Grady and Chris L Smith explore the architecture of modern life science laboratories and the work that it does to engage the public recruit scientists and attract funding Looking at the varied designs of eleven important laboratories in North America Europe and Australia all built between 2005 and 2019 Kaji O Grady and Smith examine the relationship between the design of contemporary laboratory buildings and the ideas and ideologies of science Observing that every laboratory architect and client declares the same three aspirations to eliminate boundaries to communicate the benefits of its research programs and to foster collaboration Kaji O Grady and Smith organize their account according to the themes of boundaries expression and socialization For instance they point to the South Australian Health and Medical Institute's translucent envelope as the material equivalent of institutional accountability the insistent animal imagery of the NavarraBioMed laboratory in Spain and the Hillside Research Campus's mimicry of the picturesque fishing village that once occupied its site Through these and their other examples Kaji O Grady and Smith show how the architecture of the laboratory shapes the science that takes place within it **Design and Modernity in Asia** Yunah Lee, Megha Rajguru, 2022-10-20 This new edited volume of critical essays examines designs for modern living in Asia between 1945 and 1990 Focusing particularly on the post World War II and postcolonial years this book advances multidisciplinary knowledge on approaches to and designs for modern living Developed from extensive primary research and case studies each essay illuminates commonalities and particularities of the trajectories of Modernism and notions of modernity their translation and manifestation in life across Asia through design Authors address everyday negotiations and experiences of being modern by studying exhibitions architecture modern interiors printed ephemera literary discourses healthy living movements and transnational networks of modern designers They examine processes of exchange between people institutions and with governments in and across Asia as well as with the USA and countries in Western Europe This book highlights the ways in which the production and discourses of modern design were underscored by economic advancement and modernization processes and fuelled by aesthetic debates on modern design Critically exploring design for modern living in Asia this book offers fresh perspectives on Modernism to students and scholars **The**

Equitably Resilient City Zachary B. Lamb, Lawrence J. Vale, 2024-10-01 Twelve global planning and urban design interventions and what they reveal about equity centered urban resilience in the face of climate change Hillside favelas in South America imperiled by landslides Flood threatened mobile home parks on the American Gulf Coast Canal side settlements facing eviction in megacities in Southeast Asia Too often the places most vulnerable to climate change are the ones that are home to people with the fewest economic and political resources And while some leaders are starting to take action to reduce climate risks many early adaptation schemes have actually made preexisting inequalities worse In *The Equitably Resilient City* Zachary Lamb and Lawrence Vale ask how cities can adapt to climate change and other threats while also doing right by disadvantaged residents Lamb and Vale's model for the equitably resilient city includes four central domains 1 environmental safety and vitality 2 security from displacement 3 stable and dignified livelihoods and 4 enhanced self governance These principles represent the four LEGS Livelihoods Environment Governance and Security of equitable resilience To illustrate these core principles the book draws on 12 case studies from settlements facing a range of hazards across diverse geographies in the Global North and South from heat stress in Paris to drought in Bolivia to floods in Bangkok and New Orleans Offering concrete strategies in the form of planning community action and design interventions Lamb and Vale show that equitable urban resilience is not a pipe dream nor an abstract ethical proposition but an achievable reality grounded in struggle and solidarity

Design Engineering Refocused Hanif Kara, Daniel Bosia, 2017-01-17 The contents of the book will highlight the differences between the design and engineering disciplines strengths and flaws It will also illustrate examples of interdisciplinary interactions Any false dichotomies will be revealed and the many non linear processes borne out of challenging conventions between traditional and new modes of practice will be revealed Projects based on a body of experience spanning many years will be selected to support experimentation that goes beyond an undisciplined search for originality innovation and creativity In addition to writings from Hanif Kara and Daniel Bosia contributions will be sought from specialists in the field who have played a role in the operations of P art at AKT II past and present qualifying them to disseminate and distribute a particular form of knowledge Features work of architectural practices Adjaye Associates Foster Partners Heatherwick Studio HOK Serie Architects Wilkinson Eyre Architects and Zaha Hadid Architects In addition to AKT II it will encompass the work of engineers and engineering consultants such as Arup Cecil Balmond Buckminster Fuller Buro Happold Pier Luigi Nervi and Peter Rice
