A Positive Life Portraits Of Women Living With Hiv:

A Positive Life River Huston,1997 Contains photographs and interviews with thirty women in which they relate the challenges of living with HIV discussing how they learned they have the virus how their lives have changed since being diagnosed and their hopes for the future *Women, Families and HIV/AIDS* Carole A. Campbell,1999-04-13 Carole Campbell examines the position of women in the AIDS epidemic women living with HIV and women caring for HIV infected family members in a sociocultural context Campbell draws a connection among women s risk of AIDS gender roles particularly adolescent gender role socialization and male sexual behavior demonstrating that efforts to contain the spread of the disease to females must also target the male behavior that puts women at risk This study concludes that compared with men HIV infected women face unequal access to care and unequal quality of care Informed by the moving personal accounts of eleven HIV infected men and women this book offers a rare broad picture of the sociocultural causes and the impact on American society of AIDS among women *Women Take Care* Katie Hogan,2018-08-06 Self sacrificing mothers and forgiving wives caretaking lesbians and vigilant maternal surrogates these good women are all familiar figures in the visual and print culture relating to AIDS In a probing critique of that culture Katie Hogan demonstrates ways in which literary and popular works use the classic image of the nurturing female to render queer AIDS more acceptable while consigning women to conventional roles and reinforcing the idea that everyone with this disease is somehow suspect In times of crisis the figure of the idealized woman who is modest and selfless has repeatedly surfaced in Western culture as a balm and a source of comfort and as a means of mediating controversial issues Drawing on examples from journalism medical discourse fiction drama film television and documentaries Hogan describes how texts on AIDS reproduce this historically entrenched paradigm of sacrifice and care a paradigm that reinforces biases about race and sexuality Hogan believes that the growing nostalgia for women s traditional roles has deflected attention away from women s own health needs Throughout her book she depicts caretaking as a fundamental human obligation but one that currently falls primarily to those members of society with the least power Only by rejecting the stereotype of the good woman she says can Americans begin to view caretaking as the responsibility of the entire society *The Michigan Alumnus* ,1998 In volumes1 8 the final number consists of the Commencement annual **Reconstructing Illness** Anne Hunsaker Hawkins,1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins s sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the

individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human **(Post)Critical**
