A Postcapitalist Politics:

A Postcapitalist Politics J. K. Gibson-Graham, Is there life after capitalism In this creatively argued follow up to their book *The End of Capitalism As We Knew It* J K Gibson Graham offer already existing alternatives to a global capitalist order and outline strategies for building alternative economies A Postcapitalist Politics reveals a prolific landscape of economic diversity one that is not exclusively or predominantly capitalist and examines the challenges and successes of alternative economic interventions Gibson Graham bring together political economy feminist poststructuralism and economic activism to foreground the ethical decisions as opposed to structural imperatives that construct economic development pathways Marshalling empirical evidence from local economic projects and action research in the United States Australia and Asia they produce a distinctive political imaginary with three intersecting moments a politics of language of the subject and of collective action In the face of an almost universal sense of surrender to capitalist globalization this book demonstrates that postcapitalist subjects economies and communities can be fostered The authors describe a politics of possibility that can build different economies in place and over space They urge us to confront the forces that stand in the way of economic experimentation and to explore different ways of moving from theory to action J K Gibson Graham is the pen name of Katherine Gibson and Julie Graham feminist economic geographers who work respectively at the Australian National University in Canberra and the University of Massachusetts Amherst

The Politics of Social Democracy Rob Manwaring, 2021-05-12 This book addresses the meaning of contemporary social democracy and how the centre left is navigating through its current identity crisis through a series of cases of social democratic and labour parties across Europe and the Anglosphere The book examines the ideological policy electoral and organisational dilemmas facing the centre left Taking in cases including those from the UK Austria France Germany Scandinavia Australia and New Zealand it outlines and explores the current and future trajectories of the family of centre left parties This text will be of key interest to students scholars and interested readers of labour and social democratic politics centre left political parties trade unions the future of the centre left and more broadly to those studying political parties European and comparative politics

Precarious Worlds Katie Meehan, Kendra Stauss, 2015-11-15 This edited collection contributes to the theoretical literature on social reproduction defined by Marx as the necessary labor to arrive the next day at the factory gate and extended by feminist geographers and others into complex understandings of the relationship between paid labor and the unpaid work of daily life The volume explores new terrain in social reproduction with a focus on the challenges posed by evolving theories of embodiment and identity nonhuman materialities and diverse economies Reflecting and expanding on ongoing debates within feminist geography with additional cross disciplinary contributions from sociologists and political scientists *Precarious Worlds* explores the productive possibilities of social reproduction as an ontology a theoretical lens and an analytical framework for what Geraldine Pratt has called a vigorous materialist transnational feminism

The Politics of Responsibility Chad

Lavin,2023-12-11 Politics cannot function without responsibility but there have been serious disagreements about how responsibility is to be understood and huge controversies about how it is to be distributed rewarded legislated and enforced The liberal notions of personal responsibility that have dominated political thinking in the West for more than a century are rooted in the familiar territory of individual will and causal blame but these theories have been assailed as no longer adequate to explain or address the political demands of a global social structure Informed by Marx Foucault and Butler Chad Lavin argues for a postliberal theory of responsibility formulating responsibility as a process that is anchored in a persistent ability to respond not reproach Lavin works this formulation through discussions of contemporary political issues such as globalization police brutality and abortion Rather than assigning individual blame postliberal responsibility challenges the supposed autonomy of individual subjects by taking structural arguments into account Lavin concludes that a liberal concept of responsibility gives rise to a moralistic and oppressive approach to social problems while a postliberal approach highlights a shared responsibility for developing collective solutions to systemic problems Postliberal responsibility not only suggests more generous and democratic responses to social ills it also allows us to theorize a greater range of issues that demand political response

Contemplative Democracy Shannon Lee Mariotti,2025 In *Contemplative Democracy* Shannon L. Mariotti explores how contemplative practices represent a form of world building that is valuable for meaningful democracy and an overlooked form of ordinary political theory Reimagining the work of political theory employing feminist approaches and with a focus on educational spaces and democratic modes of pedagogy Mariotti examines contemplative practices as spaces where ordinary people do the work of democracy creating new political imaginaries finding new selves and founding new states of being Further this book reveals how the larger body politic may be reshaped by the everyday work people do in their own bodies

Postcapitalist Futures Adam Fishwick,Nicholas Kiersey,2021-05-20 This book critically engages with the proliferation of literature on postcapitalism which is rapidly becoming an urgent area of inquiry both in academic scholarship and in public life It collects the insights from scholars working across the field of Critical International Political Economy to interrogate how we might begin to envisage a political economy of postcapitalism The authors foreground the agency of workers and other capitalist subjects and their desire to engage in a range of radical experiments in decommmodification and democratisation both in the workplace and in their daily lives It includes a broad range of ideas including the future of social reproduction human capital circulation political Islam the political economy of exclusion and eco communities Rather than focusing on the ending of capitalism as an implosion of the value money form this book focuses on the dream of equal participation in the determination of people s shared collective destiny

Postpolitics and the Limits of Nature Andy Scerri,2019-01-01 Explores why past generations of radical ecological and social justice scholarship have been ineffective and considers the work of a new wave of scholarship that aims to reinvent the radical project and combat injustice In *Postpolitics and the Limits of Nature* Andy Scerri offers a comprehensive overview of the critical theory project from the

1960s to the present refracted through the lens of US politics and the American Left He examines why past generations of radical ecological and social justice scholarship have been ineffective in the fight against injustice and rampant environmental exploitation Scerri then engages a new wave of radicals and reformists who in the wake of the Occupy movement and the 2016 presidential election are reinventing the radical project as a challenge to injustice in the Anthropocene era Along the way he provides a fresh account of the thought of one of the major contributors to critical theory Theodor Adorno and of recent work that seeks to link Adorno's ideas to the so called new realism in political philosophy and political theory This book is something like an histoire v nementielle of contending philosophies of nature and the natural in relation to economy and politics over the past 60 odd years What is impressive is the way Scerri situates the many different activists scholars and views in the transition from Keynesian regulatory society to naturalized neoliberalism Thus authors are treated not as timeless purveyors of theory but rather as political economists rooted in the trends and currents of their particular time I believe this will be an important book Ronnie D Lipschutz coauthor of Environmental Politics for a Changing World Power Perspectives and Practice Second Edition

Handbook on the International Political Economy of Gender Juanita Elias, Adrienne Roberts, 2018-02-23 This Handbook brings together leading interdisciplinary scholarship on the gendered nature of the international political economy Spanning a wide range of theoretical traditions and empirical foci it explores the multifaceted ways in which gender relations constitute and are shaped by global politico economic processes It further interrogates the gendered ideologies and discourses that underpin everyday practices from the local to the global The chapters in this collection identify analyse critique and challenge gender based inequalities whilst also highlighting the intersectional nature of gendered oppressions in the contemporary world order

The Everyday Politics of Food Co-ops Celia Plender, 2025-05-01 National politics has a significant impact on organizing and accessing community welfare This book engages with notions of everyday politics within two London based food co ops emerging from different political environments and ideologies It provides a careful and engaging examination of the experiences of political and economic change in Austerity Britain revealing how national politics came to punctuate everyday lives within the co ops It highlights the political resonances that practices of care aid and community organizing came to have within the food co ops at a time of rapid welfare withdrawal as well as the tensions between more radical and neoliberal imaginaries that played out within them

Towards a Cultural Politics of Climate Change Harriet Bulkeley, Matthew Paterson, Johannes Stripple, 2016-09-15 Towards a Cultural Politics of Climate Change provides a new perspective on how climate change matters in policy making business and everyday life It argues that the work of low carbon transitions takes place through the creation of devices the mobilisation of desires and the articulation of dissent Using case studies from the US Australia and Europe the book examines the creation and contestation of new forms of cultural politics of how a climate changed society is articulated realized and contested Through this approach it opens up questions about how where and by whom climate

politics is conducted and the ways in which we might respond differently to this societal challenge This book provides a key reference point for the emerging academic community working on the cultural politics of climate change and a means through which to engage this new area of research with the broader social sciences
