Trudy Govier, 2014 *On Reasoning and Argument* David Hitchcock, 2017-04-06 This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument In seven new chapters he updates his thinking in the light of subsequent scholarship Collectively the papers articulate a distinctive position in the philosophy of argumentation Among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion advances a general theory of relevance provides comprehensive frameworks for evaluating inferences in reasoning by analogy means end reasoning and appeals to considerations or criteria argues that none of the forms of arguing ad hominem is a fallacy describes proven methods of teaching critical thinking effectively **Argument Dialectics: The Place of Reasons in**

Logic Hubert Marraud, 2025-06-12 This book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do rather than in theoretical argumentation about what to believe as inference based theories do Hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law **Problems in Argument Analysis and Evaluation** Trudy Govier, 2018-06-22 We are pleased to publish this WSIA edition of Trudy's Govier's seminal volume

Problems in Argument Analysis and Evaluation Originally published in 1987 by Foris Publications this was a pioneering work that played a major role in establishing argumentation theory as a discipline Today it is as relevant to the field as when it first appeared with discussions of questions and issues that remain central to the study of argument It has defined the main approaches to many of those issues and guided the ways in which we might respond to them From this foundation it sets the stage for further investigations and emerging research This is a second edition of the book that is corrected and updated by the author with new prefaces to each chapter

Argument Types and Fallacies in Legal Argumentation Thomas Bustamante, Christian Dahlman, 2015-04-07 This book provides theoretical tools for evaluating the soundness of arguments in the context of legal argumentation It deals with a number of general argument types and their particular use in legal argumentation It provides detailed analyses of argument from authority argument ad hominem argument from ignorance slippery slope argument and other general argument types Each of these argument types can be used to construct arguments that are sound as well as arguments that are unsound To evaluate an argument correctly one must be able to distinguish the sound instances of a certain argument type from its unsound instances This book promotes the development of theoretical tools for this task

Proof, Evidence and Hate Crime Tshepo Bogosi Mosaka, 2025-07-18 Proof is the property of a disputed fact being established inferentially from an extant fact This book explicates the structural components of this phenomenon in the context of hate crimes across various jurisdictions around the world It departs from the orthodox conception of evidence and proof as being a general value neutral or non normative and epistemic subject and offers a relativistic conception of this area of law The core argument is that proof is both semantically and methodologically determined by three conditions of materiality process and probativity This argument is then justified by the context specific application of this relativistic theory of proof to hate crimes This theoretical application of proof is sustained throughout the book using multiple examples and illustrations of hate crimes around the world The discussion both at the level of proof and hate crimes while focusing on the grounds of race religion and ethnicity specifically is framed in jurisprudential cross jurisdictional and interdisciplinary terms The book will be of interest to academics and researchers working in the areas of criminal law legal philosophy and procedural law

Arguments and Metaphors in Philosophy Daniel Cohen, 2004-02-21 In this book Daniel Cohen explores the connections between arguments and metaphors most pronounced in philosophy because philosophical discourse is both thoroughly metaphorical and replete with argumentation Cohen covers the nature of arguments their modes and structures and the principles of their evaluation and addresses the nature of metaphors their place in language and thought and their connections to arguments identifying and reconciling arguments and metaphors respective roles in philosophy

Rigour and Reason: Essays in Honour of Hans Vilhelm Hansen J. Anthony Blair , Christopher W. Tindale, 2020-06-11 Built in the centre of Copenhagen and noted for its equestrian stairway the Rundetaarn Round Tower was intended as an astronomical observatory Part of a complex of buildings that once included a university library it affords expansive views of

the city in every direction towering above what surrounds it The metaphor of the towering figure who sees what others might not whose vantage point allows him to visualize how things fit together and who has an earned stature of respect and authority fits another Danish stalwart Hans Vilhelm Hansen whose contributions to the fields of informal logic and argument theory have earned the gratitude of his colleagues and inspired this collection of essays written to express the appreciation of its authors and of the many many colleagues they represent
