Michael Brooks

At The Edge Of Uncertainty 11 Discoveries Taking Science:

At the Edge of Uncertainty Michael Brooks, 2014-06-26 The atom The Big Bang DNA Natural selection All ideas that have revolutionised science and that were dismissed out of hand when they first appeared The surprises haven't stopped here Michael Brooks bestselling author of *13 Things that Don't Make Sense* investigates the new wave of unexpected insights that are shaping the future of scientific discovery Through eleven radical new insights Brooks takes us to the extreme frontiers of what we understand about the world He journeys from the observations that might rewrite our history of the universe through the novel biology behind our will to live and on to the physiological root of consciousness Along the way he examines how the underrepresentation of women in clinical trials means that many of the drugs we use are less effective on women than men and more likely to have adverse effects explores how merging humans with other species might provide a solution to the shortage of organ donors and finds out if there is such a thing as the will to live When we think about science we often think of iron clad facts But today more than ever our unshakeable truths have been shaken apart As Michael Brooks reveals the best science is about open mindedness imagination and a love of mind boggling adventures at the edge of uncertainty

At the Edge of Uncertainty Michael Brooks, 2015-02-10 Engaging touches on advanced computing essential differences between men and women the power of the will to live mysteries of the cosmos and more The Washington Post The atom The Big Bang DNA Natural selection All are ideas that revolutionized science and all were dismissed out of hand when they first appeared The surprises haven't stopped in recent years and in *At the Edge of Uncertainty* bestselling author Michael Brooks investigates the new wave of radical insights that are shaping the future of scientific discovery Brooks takes us to the extreme frontiers of what we understand about the world He journeys from the observations that might rewrite our story of how the cosmos came to be through the novel biology behind our will to live and on to the physiological root of consciousness Along the way he examines the gender imbalance in clinical trials explores how merging humans with other species might provide a solution to the shortage of organ donors and finds out whether the universe really is like a computer or if the flow of time is a mere illusion Absorbing scintillating the edgy edge of scientific investigation presented with verve Kirkus Reviews Mind bending Brooks handily works his way through these thorny problems highlighting current research and researchers along the way Publishers Weekly starred review

Into the Headwinds Terryl Givens, Nathaniel Givens, 2022-10-18 A deeper look at how people individually and collectively form religious beliefs and what that means for faith in an increasingly secular culture Secularism is increasingly a fact of life in Western society But that doesn't necessarily mean that faith is harder than it has been before Even in the past when organized religion enjoyed more widespread cultural acceptance there were still obstacles to true belief Today the obstacles are different but faith is still viable Acclaimed author Terryl Givens and his son Nathaniel Givens combine their respective areas of expertise to offer a fresh take on religious belief through the lens of contemporary research on psychology cognition and human nature They also address two of faith's

foremost modern day antagonists rationalism the myth that humans can or should make the majority of their choices based on logical thought and scientism the myth that science is the only reliable means of discovering truth After reckoning with the surprising fact that people often don't even understand their own beliefs and are influenced in ways they seldom perceive the authors go on to describe genuine faith as an act of will an effortful response to the deepest yearnings of the mind and heart that engenders moral responsibility the ability to embrace uncertainty the motivation and means to relate to others and the capacity to apprehend reality through nonrational means Written for truth seekers who may or may not belong to religious communities Into the Headwinds is less a work of apologetics than an inquiry into the role that faith can and does still play in a society where participation in institutional religion is declining precipitously Terryl and Nathaniel Givens propose that to reclaim the power of genuine faith we need to first acknowledge the reality that religious belief is hard It always has been and it always will be But perhaps instead of a hindrance that is its most important aspect

The Body Bill Bryson, 2019-10-15 NEW YORK TIMES BESTSELLER A must read owner's manual for every body Take a head to toe tour of the marvel that is the human body in this delightful anecdote propelled read The Boston Globe from the author of A Short History of Nearly Everything With a new Afterword You will marvel at the brilliance and vast weirdness of your design The Washington Post Bill Bryson once again proves himself to be an incomparable companion as he guides us through the human body how it functions its remarkable ability to heal itself and unfortunately the ways it can fail Full of extraordinary facts your body made a million red blood cells since you started reading this and irresistible Brysonesque anecdotes The Body will lead you to a deeper understanding of the miracle that is life in general and you in particular As Bill Bryson writes We pass our existence within this wobble of flesh and yet take it almost entirely for granted The Body will cure that indifference with generous doses of wondrous compulsively readable facts and information As addictive as it is comprehensive this is Bryson at his very best

The Rise of Science Peter Shaver, 2018-07-17 How did science rise up to so dramatically change our world and where will it take us in the future This book gives a unique and broad overview A brief history reveals the major phases and turning points in the rise of science from the earliest civilizations to the present How was science discovered Why did it disappear a few times When did it become modern A critical assessment examines how science actually happens the triumphs the struggles the mistakes and the luck Science today is endlessly fascinating and this book explores the current exponential growth curiosity driven vs goal oriented research big and small science the support of science the relation of science to society philosophy and religion and the benefits and dangers of science Finally a glimpse into the future Will the current pace of science continue Will we ever go backwards again What remains to be discovered Can science ever be complete What can we imagine for the distant future This book will be of wide interest to the general reader as well as to students and working scientists This book provides a fresh unique and insightful coverage of the processes of science its impact on society and our understanding of the world based on the author's experience gained from a lifetime in science Ron

Ekers FRS CSIRO Fellow CSIRO Astronomy Space Science former President of the International Astronomical Union Peter Shaver's comprehensive and lively survey deserves a wide readership Scientific discoveries are part of our global culture and heritage and they underpin our lives It's fascinating to learn how they were made and how they fit into the grand scheme This book isn't just for scientists it's written for all of us Martin Rees FRS Astronomer Royal former President of the Royal Society and former Master of Trinity College Cambridge This book offers a wonderfully concise and accessible insight into science its history breadth and future prospects Peter Shaver gives a feeling for what it actually means to be a practicing scientist Stephen Simpson FRS Academic Director Charles Perkins Centre School of Life and Environmental Sciences University of Sydney

Little Legends: Exceptional Men in Black History Vashti Harrison, 2019-11-19 Author illustrator Vashti Harrison shines a bold joyous light on black men through history in this 1 New York Times bestseller An important book for readers of all ages this beautifully illustrated and engagingly written volume brings to life true stories of black men in history Among these biographies readers will find aviators and artists politicians and pop stars athletes and activists The exceptional men featured include writer James Baldwin artist Aaron Douglas filmmaker Oscar Devereaux Micheaux lawman Bass Reeves civil rights leader John Lewis dancer Alvin Ailey and musician Prince The legends in Little Legends Exceptional Men in Black History span centuries and continents but each one has blazed a trail for generations to come **Thinking of**

Questions Peter Limm, 2015-09-23 This is not a conventional book It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it It does this by suggesting questions and lines of questioning on a wide range of topics The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal To this end almost all questions have a list of books or articles to provide a starter for stimulating further reading Once you start you will be hooked Never stop questioning **Beastly** Keggie

Carew, 2023-07-18 From an award winning writer a story rich exploration of our shared planet and the astonishing moving and troubled connections between humans and other animals Animals have shaped our minds our lives our land and our civilization Humanity would not have gotten very far without them and yet over the past two centuries the relationship has grown further apart In Beastly author Keggie Carew seeks to re-enchanted readers with the wild world reframing our understanding of what it is like to be an animal and what our role is as humans Beastly throws readers headlong into the mind blowing heart thumping glittering pageant of life and goes in search of our most revealing encounters with the animal world throughout the centuries to show where we've come from and where we're going How did we domesticate animals and why did we choose sheep goats cows pigs horses and chickens but never zebras How can whales help solve climate change What does it mean when a young woman befriends a boar a gorilla tells a joke or a fish thinks What does a wren sing Beastly is a gorgeously written deeply researched and intensely felt journey into the splendor and genius of animals and the long complicated story of our interactions with them as humans Our relationship with animals has shaped our planet and if
