A Woman Doing Life Summary:

A Woman Doing Life Erin George, 2014-12 Revised edition of the author's *A woman doing life* published in 2010

The Routledge History of Women in Early Modern Europe Amanda L. Capern, 2019-10-30 *The Routledge History of Women in Early Modern Europe* is a comprehensive and ground breaking survey of the lives of women in early modern Europe between 1450 and 1750. Covering a period of dramatic political and cultural change, the book challenges the current contours and chronologies of European history by observing them through the lens of female experience. The collaborative research of this book covers four themes: the affective world, practical knowledge for life, politics and religion, arts, science and humanities. These themes are interwoven through the chapters which encompass all areas of women's lives: sexuality, emotions, health and wellbeing, educational attainment, litigation and the practical and leisured application of knowledge, skills and artistry, from medicine to theology. The intellectual lives of women through reading and writing and their spirituality and engagement with the material world are also explored. So too is the sheer energy of female work including farming and manufacture, skilled craft and artwork, theatrical work and scientific enquiry. *The Routledge History of Women in Early Modern Europe* revises the chronological and ideological parameters of early modern European history by opening the reader's eyes to an exciting age of female productivity, social engagement and political activism across European and transatlantic boundaries. It is essential reading for students and researchers of early modern history, the history of women and gender studies.

The Unknown History of Jewish Women Through the Ages Rachel Elior, 2023-05-22 *The Unknown History of Jewish Women: On Learning and Illiteracy, On Slavery and Liberty* is a comprehensive study on the history of Jewish women which discusses their absence from the Jewish Hebrew library of the People of the Book and interprets their social condition in relation to their imposed ignorance and exclusion from public literacy. The book begins with a chapter on communal education for Jewish boys which was compulsory and free of charge for the first ten years in all traditional Jewish communities. The discussion continues with the striking absence of any communal Jewish education for girls until the late nineteenth and early twentieth century and the implications of this fact for twentieth century immigration to Israel, 1949-1959. The following chapters discuss the social, cultural and legal contexts of this reality of female illiteracy in the Jewish community, a community that placed a supreme value on male education. The discussion focuses on the patriarchal order and the postulations, rules, norms, sanctions and mythologies that in antiquity and the Middle Ages laid the religious foundations of this discriminatory reality.

A History of Women in Psychology and Neuroscience Dale DeBakcsy, 2024-09-30 Since virtually its first moments as an academic science women have played a major role in the development of psychology gaining from the outset research opportunities and academic positions that had been denied them for centuries in other branches of scientific investigation Look wherever you will in any branch of psychology or neuroscience in the last century and a half and what you will find are a plethora of women whose discoveries fundamentally changed how we view the brain and its role in the formation of our perceptions and behaviors A History of Women in Psychology and Neuroscience tells the story of 267 women whose work opened new doors in humanity's ongoing attempt to learn about its own nature from Christine Ladd Franklin's late 19th century studies of how the brain perceives color to Virginia Johnson's pioneering studies of the human sexual response and Augusta Dejerine Klumpke's early association of neurological conditions with their underlying brain regions to May Britt Moser's Nobel winning discovery a century later of the grid cells that allow us to mentally model our surroundings Here are the stories of when and how we learned how memories are formed what role an enriched environment plays in mental development why some individuals are better able to cope with chronic stress than others how societal stereotypes unconsciously feed into our daily interactions with other people what role evolution might have played in the formation of our social habits what light the practices of sign language might shed on our brain's basic capacity for language how children internalize the violence they experience from others and hundreds of other tales of the women who dug deep into the structures of the human mind to uncover layer by layer the answers to millennia old questions of what humans are and why they behave as they do

The Routledge History of Women in Europe since 1700 Deborah Simonton, 2006-04-27 The Routledge History of Women in Europe since 1700 is a landmark publication that provides the most coherent overview of woman's role and place in western Europe spanning the era from the beginning of the eighteenth century until the twentieth century In this collection of essays leading

women's historians counter the notion of national histories and provide the insight and perspective of a European approach. Important intellectual, political, and economic developments have not respected national boundaries, nor has the story of women's past or the interplay of gender and culture. The interaction between women's ideology and female agency, the way women engaged with patriarchal and gendered structures and systems, and the way women carved out their identities and spaces within these informs the writing in this book. For any student of women's studies or European history, *The Routledge History of Women in Europe since 1700* will prove an informative addition to their studies.

Genetic Information Alison K. Thompson, Ruth F. Chadwick, 2007-07-23

It is difficult to think of an example of an advancement in the biological sciences that has had an impact on society similar to that of the new genetics. Recent developments in biotechnology have occasioned much discussion among academics, professionals, and lay people alike. In particular, many questions and concerns have arisen over the acquisition, access, and control of genetic information. There are several reasons why the new genetics has commanded such widespread attention and why it is now the subject of considerable debate. Special reference is given in this volume to the implications of genetic information for five different subject areas: eugenics, the insurance industry, the commercialisation of genetic testing, strategies for raising public awareness, and the value of theoretical, ethical, and sociological frameworks in the debate. This diverse collection of papers attempts to address and critically discuss issues surrounding the control of and access to genetic information from ethical, medical, legal, and theoretical points of view. The first and shortest section of the book attempts to address concerns over the eugenic potential of new biotechnologies. It also provides a historical context for the debate. Controversy over the subject of eugenics predates the current debate over genetic information by a considerable length of time. Indeed, by the time the first patent was issued for Chakrabarty's strain of oil-eating bacteria in the early 1970s, the term eugenics had already acquired strong pejorative connotations.
