ABAP 4 Workbench Tutorial, 1996 **R/3 System Release 3.0** SAP-Aktiengesellschaft Systeme, Anwendungen, Produkte in der Datenverarbeitung, 1996 **Software Development for SAP R/3®** Ulrich Mende, 2012-12-06

The use of commercial standard software is increasing in importance throughout the world. With its R/3 product, SAP AG has brought the package on the market that provides the most comprehensive functionality. When standard solutions are used, there is a priori a conflict of aims between what the standard offers and the company-specific requirements. SAP counters this in the R/3 System by building a modular software that can be customized to meet the customer requirements. However, many users still see themselves forced to make in-house developments to various degrees to fit the R/3 System. Here they can use the ABAP Workbench that SAP supplies with every system. The present book targets those persons who need to perform these customer-oriented supplementary developments. It leads the reader through the fundamentals of software development within the R/3 System using the ABAP Workbench. These principles differ from other development environments in particular through their complexity and the close integration with the R/3 System. Because an installation for testing and training purposes on the PC at home is not an option, I considered a structured, understandable introduction to the material in the form of a book. If you initially read the book offline from an R/3 System, you will find it to be more important.

Developing SAP's R/3 Applications with ABAP/4 Rüdiger Kretschmer, Wolfgang Weiss, 1996. Written by two of the product's developers, this book covers all basic ABAP/4 language features and provides an easy way to learn without attending an expensive six-month course. In three parts, this guide to building R/3 applications is ideal for software professionals, consultants, students, and IS managers and planners.

Practical Guide to SAP ABAP Part 2: Performance, Enhancements, Transports Thomas Stutenbäumer. This book offers a comprehensive practical guide to SAP ABAP development for ABAP professionals. Part 2 explores program performance, authorizations, error analysis, corrections, and SAP Transport Management, along with how to tailor SAP applications. Dive into performance analysis and get tips on using the performance trace and ABAP runtime analysis. Walk through the tools available to enhance standard SAP applications, such as the Modification Assistant, user exits, business add-ins (BAdIs), and the Enhancement Framework. Identify techniques for authorization management and find out how SAP ABAP developers can impact data protection. Obtain best practices for identifying the cause of application errors. Get step-by-step instructions for transports and learn how to correct errors. By using practical examples, tips, and screenshots, the author brings readers up to speed on the fundamentals of SAP ABAP development. Developer influence on performance, SAP access, and account
