When adjusting the steering wheel to a comfortable position, adjust the steering wheel so that it points toward your chest, not toward your face. Make sure you can see the instrument cluster warning lights and gauges. After adjusting, push the steering wheel both up and down to be certain it is locked in position.

Always adjust the position of the steering wheel before driving.

### WARNING

**NEVER** adjust the steering wheel while driving. This may cause loss of vehicle control resulting in an accident.

## Manual adjustment

To adjust the steering wheel angle and height:

1. Pull down the lock-release lever ①.
2. Adjust the steering wheel to the desired angle ② and distance forward/back ③.
3. Pull up the lock-release lever to lock the steering wheel in place.

### Information

Sometimes the lock release lever may not engage completely. This may occur when the gears of the locking mechanism do not completely mesh. If this occurs, pull down on the lock-release lever, readjust the steering wheel again, and then pull back up on the release lever to lock the steering wheel in place.
