Leading America Sean Spicer,2020-10-13 The former White House Press Secretary and Communications

Director analyzes our current political moment through the lens of politics and culture and argues that President Trump has put the country back on the right track and needs to be reelected in 2020 When it was announced that Sean Spicer would be the newest guest on ABC's Dancing with the Stars he was promptly attacked by countless liberal media institutions Apparently they'd rather see him crawl under a rock forever than have a little fun on television while raising money for charity And that was only a small example All over the country liberals are attacking conservatives with the kind of fervor once reserved for hardened criminals It's a zero sum game either you're with them one hundred percent or you're the enemy Whether you're in politics media academia or entertainment it's the same story As one of the few people who's played a small part in all of those worlds Sean Spicer has a unique perspective on the methods used by the left to shut down conservative voices He's been parodied on SNL ripped apart on the nightly news and protested on college campuses all for doing his job Outside of the left's bubble however he's been able to transition from politics to entertainment very well and he's got huge numbers of supporters In *Leading America* he writes about all the ways President Trump has fought back against the Left and examines all the ways conservatives can take a stand to uphold their rights and values

Transgenerational Media Industries Derek Johnson, 2019-11-12 Within corporate media industries adults produce children's entertainment Yet children presumed to exist outside the professional adult world make their own contributions to it creating and posting unboxing videos for example that provide content for toy marketers Many adults meanwhile avidly consume entertainment products nominally meant for children Media industries reincorporate this market disrupting participation into their strategies even turning to adult consumers to pass fandom to the next generation Derek Johnson presents an innovative perspective that looks beyond the simple category of kids media to consider how entertainment industry strategies invite producers and consumers alike to cross boundaries between adulthood and

childhood professional and amateur new media and old Revealing the social norms reproductive ideals and labor hierarchies on which such transformations depend he identifies the lines of authority and power around which legacy media institutions like television comics and toys imagine their futures in a digital age Johnson proposes that it is not strategies of media production but of media reproduction that are most essential in this context To understand these critical intersections he investigates transgenerational industry practice in television co viewing recruitment of adult comic readers as youth outreach ambassadors media professionals identification with childhood the branded management of adult fans of LEGO and the labor of child YouTube video creators These dynamic relationships may appear to disrupt generational and industry boundaries alike However by considering who media industries empower when generating the future in these reproductive terms and who they leave out Johnson ultimately demonstrates how their strategies reinforce existing power structures This book makes vital contributions to media studies in its fresh approach to the intersections of adulthood and childhood its attention to the relationship between legacy and digital media industries and its advancement of dialogue between media production and consumption researchers It will interest scholars in media industry studies and across media studies more broadly with particular appeal to those concerned about the current and future reach of media industries into our lives

Athletes Breaking Bad John C. Lamothe, Donna J. Barbie, 2020-06-24 At their basic level sporting events are about numbers wins and losses percentages and points shots and saves clocks and countdowns However sports narratives quickly leave the realm of statistics The stories we tell and retell sometimes for decades make sports dramatic and compelling Just like any great drama sports imply conflict not just battles on the field of play but clashes of personalities goals and strategies In telling these stories we create heroes but we also create villains This book is about the latter those players who transgress norms and expectations and who we label the bad boys of sports Using a variety of approaches these 13 new essays examine the cultural social and rhetorical implications of sports villainy Each chapter focuses on a different athlete and sport questioning issues such as how notorious sports figures are defined to be bad within particular sports and within the larger culture the role media play in creating antiheroes fan reactions when players cross boundaries and how those boundaries shift depending on the athlete s gender sexuality and race
