

AVEVA PDMS

Accurate and clash-free 3D plant design

With ever increasing global demand for products from process and power plants, AVEVA PDMS™ enables companies to design, construct and maintain high quality plants quickly and efficiently.

Using PDMS, the logical model of a plant can be quickly and efficiently modelled into a full 3D design layout, where suitability and fit can all be tested in a virtual world, and the list of materials needed to construct the plant generated automatically.

PDMS enables teams of designers from a range of different disciplines to work concurrently to develop a complete digital model of a process or power plant. Each discipline works within its own specialist 3D environment, but is still able to view all of the design work taking place around them.

An extensive catalogue of predefined parametric components and objects can be quickly selected and positioned within the model, and then automatically checked for clashes and integrity using configurable rules. Changes made as the design evolves are highlighted and tracked, making it easier to identify, manage and communicate the changes across the different disciplines. The end result is a more accurate, better quality design that helps avoid costly on-site rework.

AVEVA PDMS can design every detail – even on the world's largest projects

Business Benefits

Reduced site rework

- Higher quality design. The ability to perform multiple design checks across the entire design eliminates errors, and enables 'right-first-time' engineering.
- Accurate materials information eliminates over-ordering and delays on site due to a lack of required materials or information.

More effective use of globally dispersed design teams

- PDMS, combined with AVEVA Global™, allows geographically separate design teams to work together as though they were in a single office. The environment delivers high performance for the designer, centralised administration and control, and protection from communication limitations or failures.
- Effective use can be made of design capability, wherever it exists. Project teams can be quickly assembled and mobilised.

Maximised project quality

- 3D multi-discipline working environment improves communication between teams and facilitates 'right-first-time' design.
- Clash checking and integrity checking ensure higher quality designs and less rework.
- Database-driven drawing production achieves consistency between drawings, reports and design data.
