Tannas, William E. Glenn, Joseph William Doane, 1995-12-31 Large scale manufacturing of liquid crystal flat panel displays (LCDs) by Japan brought the world's attention to the existence of an enormous market potential which exists when there are alternatives to the cathode ray tube (CRT). The Japanese have recognized that new display technologies are critical to making their products highly competitive in the world market. The CRT is losing market share to the solid state flat panel display. Japan currently holds 90% of the market and this book outlines

opportunities in the former Soviet Union where companies with the necessary technology are seeking partners investment and manufacturing opportunities Entire cities that were once not even on the map due to their military mission are now appearing filled with state of the art electronic technology The book is developed from the reports issued by investigators based on their field visits to 33 sites in Japan and 26 sites in Russia Ukraine and Belarus **Gas Fluidization M.**

Pell,2012-12-02 This book is a much needed fluidization handbook for practising engineers There are few plants which do not have a fluid bed process operating somewhere on the site yet engineers rarely have any formal training in the subject College courses often emphasize academic issues rather than industrial needs and a study of the literature reveals an overwhelming abundance of correlations and experimental data As this is a practical book the author has minimized theoretical development of fundamental equations in favor of giving correlations which have been developed for large scale equipment In some cases where several correlations might apply the author has chosen one or two which work best according to his own experience Design procedures are described which should assist the designer and the operator of fluid beds to improve his process and to avoid some often encountered pitfalls The material will also be useful as a supplementary text to a course on fluidization the emphasis on commercial design being a stimulating counterpoint to a strongly academic viewpoint
