

AXIS 221 Day & Night Network Camera

High performance, professional day and night network camera

The AXIS 221 Day & Night Network Camera is a high performance camera for professional surveillance and remote monitoring. AXIS 221 is designed to meet demanding security installations under all light conditions and is supported by the industry's largest base of application software for video and alarm management.

Thanks to the high-quality Pentax lens and progressive scan CCD (non-interlaced) image sensor, this camera delivers crisp, clear images even of objects moving at high speed in the dark. The AXIS 221 features a removable infrared cut filter, which enables color video in high and low light conditions as well as IR sensitive black/white video at night.

The integrated Power over Ethernet option eliminates the need for a power outlet, as power is supplied to the camera via the network cable, and a steady power stream can be guaranteed with a UPS (Uninterruptible Power Supply). Furthermore, the unique combination of simultaneous Motion JPEG and MPEG-4 streams allows systems to be optimized for both image quality and bandwidth-efficiency. Additionally, the product offers a complete set of security features such as multi-level password protection, IP address filtering and HTTPS encryption. The support for HTTPS provides a secure channel between camera and application and enables authentication of the video source.

- IR sensitivity for high quality images in low light conditions
- Progressive Scan provides full resolution images of moving objects, without distortions
- Power over Ethernet (IEEE 802.3af)
- Up to 45 frames per second in VGA, 640 x 480 resolution
- Simultaneous Motion JPEG and MPEG-4
- Multi-window motion detection
