Industrial Robots Programming J. Norberto Pires, 2007-04-03 Industrial Robots Programming focuses on designing and building robotic manufacturing cells and explores the capabilities of today's industrial equipment as well as the latest computer and software technologies. Special attention is given to the input devices and systems that create efficient human-machine interfaces and how they help non-technical personnel perform necessary programming control and supervision tasks. Drawing upon years of practical experience and using numerous examples and illustrative applications, J. Norberto Pires covers robotics programming as it applies to the current industrial robotic equipment including manipulators control systems and programming environments. Software interfaces that can be used to develop distributed industrial manufacturing cells and techniques which can be used to build interfaces between robots and computers. Real-world applications with examples designed and implemented recently in the lab. Industrial Robots Programming has been selected for indexing by Scopus. For more information about Industrial Robotics, please find the author's Industrial Robotics collection at the iTunesU University of Coimbra channel.

Basics of Robotics Adam Morecki, Jozef Knapczyk, 2014-05-04 This volume contains the basic concepts of modern robotics: basic definitions, systematics of robots in industry, service medicine and underwater activity. Important information on walking and mobile walking machines are included, as well as possible applications of microrobots in medicine, agriculture, underwater activity.

Introduction to Robotics in CIM Systems James A. Rehg, 2003 Written from a manufacturing perspective, this book takes readers step by step through the theory and application techniques of designing and building a robot-driven automated work cell from selection of hardware through programming of the devices to economic justification of the project. All-inclusive in approach, it covers not only robot automation but all the other technology needed in the automated work cell to integrate the robot with the work environment and with the enterprise database. Robot and other required automation hardware and software are introduced in the order in which they would be selected in an actual industrial automation design. Includes system troubleshooting guides, case studies, problems, and worked example problems. Robot Classification, Automated Work Cells and CIM Systems, End of Arm Tooling, Automation Sensors, Work Cell Support Systems, Robot and System Integration, Work Cell Programming, Justification and Applications of Work Cells, Safety, Human Interface, Operator Training, Acceptance and Problems. For those interested in Robotics and Manufacturing Automation or Production Design.
