4-WAY MULTIPOISE DESIGN ALLOWS MORE APPLICATIONS

A05085

A UNIQUE SEER SOLUTION

The *Plus 90x* is an exciting addition to your product line. This high-efficiency 4-way multipoise design furnace allows more applications while the ECM motor and Bryant's control logic combine to provide a SEER increase of up to 1.5 points.*

Some of Bryant's best-engineered components contribute to the efficient performance of this condensing furnace. The *Plus 90x* utilizes *Perfect Light™* hot surface ignition (HSI), which ignites the burners directly. HSI eliminates gas waste that typical continuous-pilot designs can bring. Hot surface ignition has proven to contribute to reliable start-up and operation of Bryant furnaces.

Another deluxe feature included with this furnace is Bryant's trusted *Everlastic™* secondary heat exchanger; a patented polypropylene laminate that provides exceptional heat transfer and corrosion resistance. Using the exclusive flow-through design, the secondary heat exchanger reduces the pressure drop in

the furnace resulting in lower electrical usage. The high efficiency achieved by superior heat transfer is made only better—by optimizing the efficient ECM motor speed tap locations.

A standard media filter cabinet accessory is provided with the *Plus 90x* in order to provide an opportunity to enhance indoor air quality. As with all other Bryant furnaces, this model is designed to work as a part of the total home comfort system which includes elements for cooling, air cleaning, humidification, ventilation and zoning. Boosting the unit's efficiency with the ECM motor and Bryant's deluxe features show the *Plus 90x* has been designed with the homeowner in mind.

PLUS 90X FEATURES & BENEFITS

Everlastic™ — Exclusive Everlastic coating, a patented polypropylene laminate is used on the secondary heat exchanger and greatly reduces maintenance.

Perfect Light™ Igniter — Bryant's unique Perfect Light™ igniter is not only physically robust but it is also electrically robust. It is capable of running at line voltage and does not require complex voltage regulators as do other brands. This unique feature further enhances the reliability of the *Plus 90x* gas furnace and continues Bryant's tradition of technology leadership and innovation in providing a reliable and durable product.

FanOn™ — Improves comfort all year long by allowing the homeowner to select different fan speeds during continuous fan operation to achieve more or less airflow. This is done right at the thermostat.

SmartEvap™ — This feature allows your system to reduce summertime humidity levels by nearly 10% over standard systems.

Media Filter Cabinet — Enhanced indoor air quality in your home is made easier with our media filter cabinet—a standard accessory on all Deluxe furnaces. When installed as a part of your system, this cabinet allows for easy and convenient addition of a Bryant high-efficiency air filter.

Control Center — Microprocessor controls sequencing and furnace operation. Equipped with a component test feature and status indicator light to assist in troubleshooting. Microprocessor controls blower times to start blower after main burners ignite to eliminate cold air blowing into rooms.

*as compared to the Air-Conditioning, Heating and Refrigeration Institute's standard coil—only rating (A/Cs up to 5.5 tons) when paired with selected Bryant evaporator coils.
