those advances the time has come to retool tribology's master text. In addition to offering tribologists the facts, figures, and equations they need everyday, Volume I: Application and Maintenance, Second Edition, positions itself at the forefront of the field to address the latest technology related to application and maintenance procedures, as well as changes in our understanding of how lubrication principles impact implementation. Completely reorganized to aid the reader in identifying chapters and topics of interest, every one of the chapters retained from the first edition has either been fully updated and revised or completely rewritten by a peer recognized team of experts who are currently active in a wide variety of industry segments. With the addition of several new subject areas, it now boasts a total of 37 chapters.

Organizational Resilience D. Christopher Kayes, 2015. In the age of knowledge, organizations survive and thrive only when they learn. All too often when organizations are confronted with novel or changing situations, the process of learning breaks down, and the result is catastrophic. In *Organizational Resilience: How Learning Sustains Organizations in Crisis*, Disaster and Breakdown, D. Christopher Kayes explains why all organizational leaders should be concerned about learning and the dire consequences that may ensue if they are not. Kayes draws on the foundational ideas of philosopher John Dewey, then connects this philosophy to contemporary studies on learning, management, and organizations. Through a wide range of examples from the realms of government, finance, engineering, healthcare, and commercial air travel, he describes how learning can help organizations weather crises and outlines specific ways that leaders can learn from their experience. The first comprehensive review of how learning sustains organizations in challenging times, *Organizational Resilience* is essential reading for crisis managers, disaster recovery team leaders, continuity of operations planning professionals, emergency management professionals, and leaders at all levels who want their organizations to thrive.
