Mother of Invention Katrine Marçal, 2021-10-19 An illuminating and maddening examination of how gender bias has skewed innovation technology and history now in paperback It all starts with a rolling suitcase Though the wheel was invented some 5 000 years ago and the suitcase in the 19th century it wasn't until the 1970s that someone successfully married the two What was the holdup For writer and journalist Katrine Mar al the answer is both shocking and simple because real men carried their bags no matter how heavy *Mother of Invention* is a fascinating and eye opening examination of business technology and innovation through a feminist lens Because it wasn't just the suitcase Drawing on examples from electric cars to tech billionaires Mar al shows how gender bias stifles the economy and holds us back delaying innovations sometimes by hundreds of years and distorting our understanding of our history While we talk about the Iron Age and the Bronze Age we might as well talk about the Ceramic Age or the Flax Age since these technologies were just as important But inventions associated with women are not considered to be technology in the same way as those associated with men *Mother of Invention* is a sweeping tour of the global economy with a powerful message If we upend our biases we can unleash our full potential
