Wetlands Ralph W. Tiner, Megan W. Lang, Victor V. Klemas, 2015-03-23 Effectively Manage Wetland Resources Using the Best Available Remote Sensing Techniques Utilizing top scientists in the wetland classification and mapping field Remote Sensing of Wetlands Applications and Advances covers the rapidly changing landscape of wetlands and describes the latest advances in remote sensing that have taken place over the past 20 years **Remote Sensing** J D Greer, 1996-09-30 **Classification and Inventory of the World's Wetlands** C.M. Finlayson, Arnold van der Valk, 2012-12-06 This book brings together for the first time information on various wetland classification systems and wetland inventories from around the world outlining regional national and local wetland classifications developed in Africa Australia Canada China Europe India South America and the USA Oriented towards the conservation and management of wetlands these existing national and regional classification systems have been useful in providing an essential base for the development of an international system The volume also reviews various attempts at drawing up an inventory of wetlands in different parts of the world ranging from field and literature surveys to highly sophisticated efforts using aerial photography and satellite imaging Audience Workers in wetland ecology especially those working on classification inventory conservation or management of wetlands at the local national regional or international levels Use of Preclassification Image Masking to Improve the Accuracy of Wetland

Mapping Undertaken in Support of Statewide Land Cover Classification David E. Nagel, 1995 *Remote Sensing and Ecosystem Management* Jerry D. Greer, 1998-04 *Space Informatics for Sustainable Development* S. Murai, R.B. Singh, 1998-01-01 This text deals with the subject of remote sensing and the use of technology to aid environmental maintenance Topics covered include a microcomputer based grassland local administration support system and the monitoring of Himalayan cryosphere using satellite imagery Wetlands of the Interior Southeastern United States C.C. Trettin, W.M. Aust, Joe Wisniewski, 2012-12-06 The early 1990's marked an environmental watershed for our country Under

two federal administrations significant environmental legislative regulatory and institutional changes took place which affected our Nation's wetland resources. In just a few years we have seen rapid evolution in the way in which we view wetlands with more emphasis on specific wetland types and the geographic provinces in which they occur. This Southern Appalachian Man and the Biosphere (SAMAB) conference on Wetland Ecology Management and Conservation represents just one example of our desire to understand wetlands in non coastal regions of the southern United States. The backdrop to this conference was one where the government, universities and private sector have come together to create a broader and more sophisticated understanding of environmental stewardship for our water resources especially wetlands. Although enforcement of environmental legislation by federal and state government agencies limited by manpower shortages, budgetary constraints and undermined by weak enforcement remains strong as measured by world standards, the realization that environmental degradation of wetlands is likely to get much worse necessitates a greater commitment and increased resource allocation for wetland protection and management. These continued pressures on the wetland resource will create substantial opportunities for the application of environmentally sound technologies and interdisciplinary modeling teams to keep abreast of the factors influencing wetland integrity and function in the last half of the 1990's.

Southern Forested Wetlands
Michael G. Messina, William H. Conner, 2019-09-18

Originally published in 1998, *Southern Forested Wetlands* is an up to date one source compendium of current knowledge on the wetland ecology of America's southern forests. This book presents both the ecological and management aspects of these important ecosystems. The book was compiled by members of the Consortium for Research on southern forested wetlands and was a collaboration of those working to conserve study and manage these economically and environmentally influential areas. The book covers geographic ranges from West Virginia to Florida to Texas and inland north to Arkansas and Tennessee. It also addresses specific wetland types including deep water swamps, major and minor alluvial flood plains, pocosins and Carolina bays, mountain fens, pond cypress swamps, flatwoods, wetlands and mangroves.
