Business Mid Year Exam Grade12 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

How Chinese Acquire and Improve Mathematics Knowledge for Teaching Yeping Li, Rongjin Huang, 2018-05-16 While the importance of knowledge for effective instruction has long been acknowledged and the concept and structure of mathematics knowledge for teaching are far from being new, the process of such knowledge acquisition and improvement remains underexplored empirically and theoretically. The difficulty can well associate with the fact that different education systems embody different values for what mathematics teachers need to learn and how they can be assisted to develop their knowledge. To improve this situation with needed consideration about a system context and policies, *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* takes a unique approach to present new research that views knowledge acquisition and improvement as part of teachers' life-long professional learning process in China. The book includes such chapters that can help readers to make possible connections of teachers' mathematical knowledge for teaching in China with educational policies and program structures for mathematics teacher education in that system context. *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* brings invaluable inspirations and insights to mathematics educators and teacher educators who wish to help teachers improve their knowledge and to researchers who study this important topic beyond a static knowledge conception.

New York State Education, 1946 *Beyond Borders, Beyond Banking* Heather A. Clark, 2020-04-29 This book examines the experiences and good practices of ACLEDA Bank Cambodia. Applicable to banks and microfinance institutions around the globe, it includes materials for classroom instruction on organizational development, financial sector development, the role of government and investors in supporting the financial market and the benefits to customers. Following on the previous publication *When There Was No Money* which tells the ACLEDA story by tracing its history and various stages of organizational development in the financial sector as it evolved in Cambodia from 1991 to 2004, this book examines the 2nd decade in the bank's history including its expansion to Lao PDR and Myanmar and the launch of subsidiaries such as ACLEDA Securities and the ACLEDA Institute of Business. Adopting a documentary approach, the book presents case studies

supported by current economic and financial literature as well as stories from a wide range of interviews with the board management staff customers competitors and regulators Given its scope the book offers a valuable resource for financial institutions investors researchers and students interested in financial inclusion financial sector development good governance of financial institutions microfinance aid effectiveness post conflict organizational development and Cambodia
