Business Process Change Management Aris In Practice:

Business Process Change Management August-Wilhelm Scheer, Ferri Abolhassan, Wolfram Jost, Mathias Kirchmer, 2012-11-03 Today's business environment is constantly changing. New customer requirements or products, an evolving competition, new IT solutions like EAI or web services, outsourcing opportunities, mergers, acquisitions, or changing legal requirements are just a few reasons for this change. Intra and inter enterprise processes of enterprises have to change accordingly. Therefore, organizations have to ensure an efficient and effective business process change management in order to stay competitive and survive on the long term. This is a precondition to achieve and maintain business process excellence. However, the execution of successful change management has been extremely difficult. Many initiatives failed because of an unclear scoping and a missing definition of deliverables. Only the comprehensive design of the business processes to be improved creates a basis for a focused management of change. Change management can then be handled as a process by itself. It becomes measurable and can be controlled. It is an integral part of business process lifecycle management. Key enabler is the ARIS Toolset which supports all activities of the process and change management. Business strategies, the resulting process specifications and execution as well as the process controlling are executed by using ARIS tools in the phase of change as well as during the daily operation.

Business Process Change Management August-Wilhelm Scheer, 2003-03-06 This book shows you how to achieve business process excellence through change management activities with case studies from major corporations such as American Meter and the US Navy. The book defines business process change management as information communication and training that enable people to make change and improvements happen. Using case studies, the text shows how this change management is applied in practice using a framework like the ARIS House of Business Process Excellence or software tools like the ARIS Toolset.
