Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1974 **The Craft of Research, Fourth Edition** Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, Joseph Bizup, William T. practitioners such that the general laws and principles gradually become evident as and of themselves The aim of this approach is to reveal the essence of negotiation through the experience of both the author and the reader Such an understanding of the processes involved in negotiation is of far greater practical value than a mere collection of recipes with no discussion of the underlying theory while the most comprehensive treatment of the theory without reference to its application in practice would be only half the story Thus the text is supplemented by a series of illustrative examples and case studies from the business political NGO and international organization arenas plus some seventy figures and tables With all this the author has paid considerable attention to writing a text that is both entertaining to read and rigorous in content
