Cyberpunk Women, Feminism and Science Fiction Carlen Lavigne, 2013-02-07 This analysis of cyberpunk science fiction written between 1981 and 2003 positions women's cyberpunk in the larger cultural discussion of feminist issues. It traces the origins of the genre, reviews the critical reactions, and outlines the ways in which women's cyberpunk advances points of view that are specifically feminist. Novels are examined within their cultural contexts; their content is compared to broader controversies within contemporary feminism, and their themes are revealed as reflections of feminist discourse around the turn of the 21st century. Chapters cover topics such as globalization, virtual reality, cyborg culture, environmentalism, religion, motherhood, and queer rights. Interviews with feminist cyberpunk authors are provided, revealing both their motivations for writing and their experiences with fans. The study treats feminist cyberpunk as a unique vehicle for examining contemporary women's issues and analyzes feminist science fiction as a complex source of political ideas.

Wetwares Richard Doyle, 2003 The mind of the machine, the body suspended in time, organs exchanged, thought computed, genes manipulated, DNA samples abducted by aliens: the terrain between science and speculation, fraught with the possibility of technological and perhaps even evolutionary transformations, is the territory Richard Doyle explores in *Wetwares*. In a manner at once sober and playful, Doyle maps potentials for human transformation by new ecologies of information in the early twenty-first century. *Wetwares* ranges over recent research in artificial life, cloning, cryonics, computer science, organ transplantation, and alien abduction. Moving between actual technical practices, serious speculative technology, and science fiction, Doyle shows us emerging scientific paradigms where life becomes more a matter of information than of inner vitality; in short, becomes wetwares for DNA and computer networks. Viewing technologies of immortality from cryonics to artificial life as disciplines for welcoming a thoroughly other future, a future of neither capital, god, human, nor organism, the book offers tools for an evolutionary transhuman mutation in the utterly unpredictable decades to come. *Complete Stories* Rudy

Rucker, 2018-07-06 Collected together in one ebook, every single one of Rudy Rucker's science fiction stories, a trove of gnarl and wonder dating over more than forty years. This, the updated 2021 edition of *Complete Stories*, includes stories from 1976 through 2021. Along with Rucker's solo stories, we have collaborations with Bruce Sterling, Marc Laidlaw, Paul Di Filippo, John Shirley, Terry Bisson, and Eileen Gunn. *The Gospel according to Science Fiction* Gabriel McKee, 2007-01-02 In this

thorough and engaging book, Gabriel McKee explores the inherent theological nature of science fiction using illustrations from television, shows, literature, and films. Science fiction, he believes, helps us understand not only who we are but who we will become. McKee organizes his chapters around theological themes, using illustrations from authors such as Isaac Asimov and H. G. Wells, television shows such as *Star Trek* and *The Twilight Zone*, and films such as *The Matrix* and *Star Wars*. With its extensive bibliography and index, this is a book that all serious science fiction fans, not just those with a theological interest, will appreciate. *SpecLab* Johanna Drucker, 2009-08-01 Nearly a decade ago, Johanna Drucker cofounded the University of
