Poritz, Jonathan Rees, 2016-08-12 Whilst much has been written about the doors that technology can open for students less has been said about its impact on teachers and professors Although technology undoubtedly brings with it huge opportunities within higher education there is also the fear that it will have a negative effect both on faculty and on teaching standards Education Is Not an App offers a bold and provocative analysis of the economic context within which educational technology is being implemented not least the financial problems currently facing higher education institutions around the world The book emphasizes the issue of control as being a key factor in whether educational technology is used for good purposes or bad purposes arguing that technology has great potential if placed in caring hands Whilst it is a guide to the newest developments in education technology it is also a book for those faculty technology professionals and higher education policy makers who want to understand the economic and pedagogical impact of technology on professors and students It advocates a path into the future based on faculty autonomy shared governance and concentration on the university's traditional role of promoting the common good Offering the first critical in depth assessment of the political economy of education technology this book will serve as an invaluable guide to concerned faculty as well as to anyone with an interest in the future of higher education **The Great American Education-industrial Complex** Anthony G. Picciano, Joel H. Spring, 2013 The Great American Education Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and objectives In the past twenty years significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States No longer left to the experience and knowledge of educators American education has become as much the domain of private organizations corporate entities and political agents who see it as a market for their ideas technologies and ultimately profits Picciano and Spring posit that educational technology is the vehicle whereby these separate movements organizations and individuals have become integrated in a powerful common

entity and detail how the educational industrial complex has grown and strengthened its position of influence This timely carefully documented well argued book brings together Picciano s perspective and expertise in the field of technology and policy issues and Spring s in the history and politics of education in a unique critical analysis of the education industrial complex and its implications for the future **Frontier and Future Development of Information Technology in**
