Where Am I in the Picture? Claudia Mitchell, Katarina Giritli-Nygren, Relebohile Molestane, 2023-12-18 Positionality and researcher reflexivity how to account for one's subject position remain as challenges for new researchers But they also remain as challenges for experienced researchers who are often involved in multiple research projects simultaneously Where Am I in the Picture sheds light on the idea of researcher positionality through visual methodologies particularly in the context of studying rurality in Canada Sweden and South Africa The book is intended for new and experienced researchers seeking to decolonize their own perspectives in research in the social sciences and humanities It incorporates photographs drawings and memory work to highlight the social constructedness of what counts as rural Drawing together compelling narratives from researchers about their positionality in studying rurality the book highlights a need for greater attention to where we are in the picture more broadly It suggests that when it comes to the rural researchers need to rethink the interplay of dominant images insider and outsider perspectives and what this interplay means in relation to interpretation Where Am I in the Picture presents a new vision of how to take into consideration positionality in research

Anthropos and the Material Penny Harvey, Christian Krohn-Hansen, Knut G. Nustad, 2019-05-09 The destructive effects of modern industrial societies have shaped the planet in such profound ways that many argue for the existence of a new geological epoch called the Anthropocene This claim brings into relief a set of challenges that have deep implications for how relations between the human the material and the political affect contemporary social worlds The contributors to Anthropos and the Material examine these challenges by questioning and complicating long held understandings of the divide between humans and things They present ethnographic case studies from across the globe addressing myriad topics that range from labor economics and colonialism to technology culture the environment agency and diversity In foregrounding the importance of connecting natural and social histories the instability and intangibility of the material and the ways in which the lively encounters between the human and the nonhuman challenge conceptions of liberal humanism the contributors point to new understandings of the capacities of people and things to act transform and adapt to a changing world
