**The Dynamics of Changing Higher Education in the Global South** Busani Mpofu, Sabelo Ndlovu-Gatsheni, 2020-06-29 Today there are generally universities in Africa rather than African universities The legitimacy of the university in Africa is under serious questions now because of its complicity in racism patriarchy sexism colonialism capitalism genocide epistemicide linguicide culturecide and alienation In other words the university in Africa as we know it today is elitist and exclusionary Therefore rethinking the idea of the university is fundamental to overcoming its current deficiencies in the Global South This volume bringing together a number of national case studies and macro analyses on the dynamics of changing higher education in the Global South gestures towards the desired imagined decolonial African university which should be a site of multilingualism where African indigenous languages cosmologies and ontologies become a central part of its identity and soul intolerant of epistemicides linguicides and cultural imperialism but a site of cognitive and social justice that fully embraces the idea that all human beings are born into valid useful relevant and legitimate knowledge systems

**William Blake as Natural Philosopher, 1788-1795** Joseph Fletcher, 2021-12-07 William Blake as Natural Philosopher 1788 1795 takes seriously William Blake's wish to be read as a natural philosopher particularly in his early works and illuminates the way that poetry and visual art were for Blake an imaginative way of philosophizing Blake's poetry and designs reveal a consistent preoccupation with eighteenth century natural philosophical debates concerning the properties of the physical world the nature of the soul and God's relationship to the material universe This book traces the history of these debates and examines images and ideas in Blake's illuminated books that mark the development of the monist pantheism in his early works which contend that every material thing is in its essence God to the idealism of his later period which casts the natural world as degenerate and illusory The book argues that Blake's philosophical thought was not as monolithic as has been previously characterized and that his deepening engagement with late eighteenth century vitalist life sciences including studies of the asexual propagation of the marine polyp marks his metaphysical turn In contrast to the vast body of scholarship that emphasizes Blake's early religious and political positions William Blake as Natural Philosopher draws out the metaphysics underlying his commitments In so doing the book demonstrates that pantheism is important because it entails an ethics that respects the interconnected divinity of all material objects not just humans which in turn spurns hierarchical power structures If everything is alive and essentially divine Blake's early work implies then everything is worthy of respect and capable of giving and receiving infinite delight Therefore one should imaginatively and joyfully immerse oneself in the community of other beings in which one is already enmeshed Often in the works discussed in this book Blake offers negative examples to suggest his moral philosophy he dramatizes the disastrous individual and social consequences of humans behaving as if God were a transcendent immaterial nonhuman demiurge and as if they were separate from and ontologically

superior to the degraded material universe that they see as composed of inert lifeless atoms William Blake as Natural Philosopher traces the evolution of eighteenth century debates over the vitalist qualities of life and the nature of the soul both in the United Kingdom and on the continent devoting significant attention to the natural philosophy of Newton Locke Berkeley Leibniz Buffon La Mettrie Hume Joseph Priestley Erasmus Darwin and many others
