

Where to place the cube speakers

You can place cube speakers anywhere from 3 to 15 feet (.9 - 4.6 m) apart. For the most natural sound in average sized rooms, place them 6 to 12 feet (1.8-3.7 m) apart. Magnetic shielding allows you to place them close to a video screen without causing interference.

Bose® mounting accessories, including wall/ceiling mounting brackets, floor stands, and table stands, add to your choice of where to place the cube speakers. For more information or to order accessories, contact your Bose dealer or call Bose directly at the "Service" number listed on the inside back page.

Where to place the Acoustimass bass module

The Acoustimass bass module can be hidden almost anywhere in a room (Figure 2). Use your sound preference and convenience as a guide. Leave at least 2 inches (5 cm) of space between the openings (ports) and the wall. And, to prevent interference, keep the module at least 2 feet (.6 m) from any video screen.

For a balanced sound in most rooms, place the module along a wall within 5 feet (1.5 m) of the corner. To increase bass response, move the module closer to a corner without blocking the openings (Figure 3). To decrease the bass, place the module farther from the corner.

Note:

When you decide how you will position the bass module, attach the rubber feet to the bottom surface to protect the module and the floor.
