Classification of Pseudo-reductive Groups Brian Conrad, Gopal Prasad, 2016 Princeton University Press is proud to have published the Annals of Mathematics Studies since 1940 One of the oldest and most respected series in science publishing it has included many of the most important and influential mathematical works of the twentieth century The series continues this tradition as Princeton University Press publishes the major works of the twenty first century To make the continued success of the series all books are again available in paperback For a complete list of titles please visit the Princeton University Press website press.princeton.edu *Pseudo-reductive Groups* Brian Conrad, Ofer Gabber, Gopal Prasad, 2015-06-04 Pseudo reductive groups arise naturally in the study of general smooth linear algebraic groups over non perfect fields and have many important applications This monograph provides a comprehensive treatment of the theory of pseudo reductive groups and gives their classification in a usable form In this second edition there is new material on relative root systems and Tits systems for general smooth affine groups including the extension to quasi reductive groups of famous simplicity results of Tits in the semisimple case Chapter 9 has been completely rewritten to describe and classify pseudo split absolutely pseudo simple groups with a non reduced root system over arbitrary fields of characteristic 2 via the useful new notion of minimal type for pseudo reductive groups Researchers and graduate students working in related areas such as algebraic geometry algebraic group theory or number theory will value this book as it develops tools likely to be used in tackling other problems **Classification of Pseudo-reductive Groups** Brian Conrad, Gopal Prasad, 1940

Wallach, 1988-03-01 Real Reductive Groups I is an introduction to the representation theory of real reductive groups It is based on courses that the author has given at Rutgers for the past 15 years It also had its genesis in an attempt of the author to complete a manuscript of the lectures that he gave at the CBMS regional conference at The University of North Carolina at Chapel Hill in June of 1981 This book comprises 10 chapters and begins with some background material as an introduction The following chapters then discuss elementary representation theory real reductive groups the basic theory of g K modules

the asymptotic behavior of matrix coefficients The Langlands Classification a construction of the fundamental series cusp forms on G character theory and unitary representations and g K cohomology This book will be of interest to mathematicians and statisticians *Representations of Reductive Groups* Roger W. Carter, Meinolf Geck, 1998-09-03 This volume provides a very accessible introduction to the representation theory of reductive algebraic groups **Real Reductive Groups I** Nolan R. Wallach, 1988-03-13 Real Reductive Groups I is an introduction to the representation theory of real reductive groups It is based on courses that the author has given at Rutgers for the past 15 years It also had its genesis in an attempt of the author to complete a manuscript of the lectures that he gave at the CBMS regional conference at The University of North Carolina at Chapel Hill in June of 1981 This book comprises 10 chapters and begins with some background material as an introduction The following chapters then discuss elementary representation theory real reductive groups the basic theory of g K modules the asymptotic behavior of matrix coefficients The Langlands Classification a construction of the fundamental series cusp forms on G character theory and unitary representations and g K cohomology This book will be of interest to mathematicians and statisticians *Real Reductive Groups I* Nolan R. Stewart, 2013-04-22 Let G G K be a simple algebraic group defined over an algebraically closed field K of characteristic $p \geq 0$ A subgroup X of G is said to be G completely reducible if whenever it is contained in a parabolic subgroup of G it is contained in a Levi subgroup of that parabolic A subgroup X of G is said to be G irreducible if X is in no proper parabolic subgroup of G and G reducible if it is in some proper parabolic of G In this paper the author considers the case that $G = F_4$ K The author finds all conjugacy classes of closed connected semisimple G reducible subgroups X of G Thus he also finds all non G completely reducible closed connected semisimple subgroups of G When X is closed connected and simple of rank at least two he finds all conjugacy classes of G irreducible subgroups X of G Together with the work of Amende classifying irreducible subgroups of type A_1 this gives a complete classification of the simple subgroups of G The author also uses this classification to find all subgroups of $G = F_4$ which are generated by short root elements of G by utilising and extending the results of Liebeck and Seitz The Classification of Finite Simple Groups Daniel Gorenstein, 2013-11-22 Never before in the history of mathematics has there been an individual theorem whose proof has required 10 000 journal pages of closely

reasoned argument Who could read such a proof let alone communicate it to others But the classification of all finite simple groups is such a theorem its complete proof developed over a 30 year period by about 100 group theorists is the union of some 500 journal articles covering approximately 10 000 printed pages How then is one who has lived through it all to convey the richness and variety of this monumental achievement Yet such an attempt must be made for without the existence of a coherent exposition of the total proof there is a very real danger that it will gradually become lost to the living world of mathematics buried within the dusty pages of forgotten journals For it is almost impossible for the uninitiated to find the way through the tangled proof without an experienced guide even the 500 papers themselves require careful selection from among some 2 000 articles on simple group theory which together include often attractive byways but which serve only to delay the journey
