Buy Online Fuel Taxes Poor Distributional Implications:

Fuel Taxes and the Poor Thomas Sterner, 2012-03-29 Fuel Taxes and the Poor challenges the conventional wisdom that gasoline taxation an important and much debated instrument of climate policy has a disproportionately detrimental effect on poor people Increased fuel taxes carry the potential to mitigate carbon emissions reduce congestion and improve local urban environment As such higher gasoline taxes could prove to be a fundamental part of any climate action plan However they have been resisted by powerful lobbies that have persuaded people that increased fuel taxation would be regressive Reporting on examples of over two dozen countries this book sets out to empirically investigate this claim The authors conclude that while there may be some slight regressivity in some high income countries as a general rule fuel taxation is a progressive policy particularly in low income countries Rich countries can correct for regressivity by cutting back on other taxes that adversely affect poor people or by spending more money on services for the poor Meanwhile in low income countries poor people spend a very small share of their money on fuel for transport Some costs from fuel taxes may be passed on to poor people through more expensive public transportation and food transport Nevertheless in general the authors find that gasoline taxes become more progressive as the income of the country in question decreases This book provides strong arguments for the proponents of environmental taxation It has immediate policy implications at the intersection of multiple subject areas including transportation environmental regulation development studies and climate change Published with Environment for Development initiative

Megacity Mobility Zongzhi Li, Adrian T. Moore, Samuel R. Staley, 2021-12-14 World population growth and economic prosperity have given rise to ever increasing demands on cities transportation planning and goods movement This growth coupled with a slower pace of transportation capacity expansion and deteriorated facility restoration has led to rapid changes in the transportation planning and policy environment These stresses are particularly acute for megacities where degradation of mobility and facility performance have reached alarming rates Addressing these transportation challenges requires innovative solutions Megacity Mobility grapples with these challenges by addressing transportation policy planning and facilities in a multimodal context It discusses innovative short and long term solutions for meeting current and future mobility needs for the world s most dynamic cities by addressing the influence of urban land use on mobility 3D spiderweb transportation planning travel demand management multimodal transportation with flexible capacity efficient capacity utilization driven by new technologies innovative transportation funding and financing and performance based budget allocation using asset management principles It discusses emerging issues highlights potential challenges affecting proposed solutions and provides policymakers planners and transportation professionals a road map to achieving sustainable mobility in the 21st century Zongzhi Li is a professor and the director of the Sustainable Transportation and Infrastructure Research STAIR Center at Illinois Institute of Technology IIT Adrian T Moore is vice president of policy at Reason Foundation in Washington D C with focuses on privatization transportation and

urban growth and more Samuel R Staley is the director of the DeVoe L Moore Center in the College of Social Sciences and Public Policy at Florida State University The Distributional Impact of Taxes and Transfers Gabriela Inchauste, Nora Lustig, 2017-09-19 The World Bank has partnered with the Commitment to Equity Institute at Tulane University to implement their diagnostic tool the Commitment to Equity CEQ Assessment designed to assess how taxation and public expenditures affect income inequality poverty and different economic groups The approach relies on comprehensive fiscal incidence analysis which measures the contribution of each individual intervention to poverty and inequality reduction as well as the combined impact of taxes and social spending The CEQ Assessment provide an evidence base upon which alternative reform options can be analyzed The use of a common methodology makes the results comparable across countries This volume presents eight country studies that examine the distributional effects of individual programs and policy measures and the net effect of each country s mix of policies and programs These case studies were produced in the context of Bank policy dialogue and have since been used to propose alternative reform options *Energy Justice and Energy Law* Iñigo del Guayo, Lee Godden, Donald D. Zillman, Milton Fernando Montoya, José Juan González, 2020-05-21 Energy justice has emerged over the last decade as a matter of vital concern in energy law which can be seen in the attention directed to energy poverty and the United Nations Sustainable Development Goals There are energy justice concerns in areas of law as diverse as human rights consumer protection international law and trade and in many forms of regional and national energy law and regulation This edited collection explores in detail at four kinds of energy justice The first distributive justice relates to the equitable distribution of the benefits and burdens of energy activities which is challenged by the existence of people suffering from energy poverty Secondly procedural or participation justice consists of the right of all communities to participate in decision making regarding energy projects and policies that affect them This dimension of energy justice often includes procedural rights to information and access to courts Under the concept of reparation or restorative justice the book looks at even handed enforcement of energy statutes and regulations as well as access to remedies when legal rights are violated Finally the collection addresses social justice with the recognition that energy injustice cannot be separated from other social ills such as poverty and subordination based on race gender or indigeneity These issues feed into a wider conversation about how we achieve a just energy transition as the world confronts the urgent challenges of climate change ,

Commitment to Equity Handbook Nora Lustig, 2018-10-30 A how to guide for assessing the impact of fiscal policy on inequality and poverty Inequality has emerged in recent years as a major topic of economic and political discussion but it is often unclear whether governments can or should do something about it and if so what that something might be This unique volume edited by Nora Lustig an equity expert at Tulane University helps fill that void Developed by the Commitment to Equity Institute at Tulane the book examines both the theory and the practical methods for determining the impact of taxation and public spending on inequality and poverty It provides a step by step guide for policymakers economists and

social planners when analyzing whether fiscal policy has narrowed or widened inequality The book also has user written software for conducting a Commitment to Equity Assessment along with several country studies of these assessments In addition to serving as a manual the book can be used as a stand alone reference for those interested in the methods for assessing the impact on equity of fiscal policy It also serves as a textbook for advanced undergraduate and graduate courses on public finance and income distribution Energy Justice in the Era of Green Transitions Edgar Liu,Neil Simcock,Mari Martiskainen,2022-03-10 **Poverty and Shared Prosperity 2022** World Bank,2022-12-09 The COVID 19 pandemic triggered a pronounced setback in the fight against global poverty likely the largest setback since World War II Many low and middle income countries have yet to see a full recovery High indebtedness in many countries has hindered a swift recovery while rising food and energy prices fueled in part by conflict and climate shocks have made a return to progress on poverty reduction more challenging than ever These setbacks have altered the trajectory of poverty reduction in large and lasting ways The world is significantly off course on the goal of ending extreme poverty by 2030 The year 2020 also marked a historic turning point as decades of global income convergence gave way to global divergence as the world s poorest people were hardest hit The richest people have recovered from the pandemic at a faster pace further exacerbating differences These diverging fortunes between the global rich and poor ushered in the first rise in global inequality in decades Poverty and Shared Prosperity 2022 Correcting Course provides the first comprehensive analysis of the pandemic s toll on poverty in developing countries It identifies how governments can optimize fiscal policy to help correct course Fiscal policies offset the impact of COVID 19 on poverty in many high income countries but those policies offset barely onequarter of the pandemic s impact in low income countries and lower middle income countries Improving support to households as crises continue will require reorienting protective spending away from generally regressive and inefficient subsidies and toward a direct transfer support system a first key priority Reorienting fiscal spending toward supporting growth is a second key priority identified by the report Some of the highest value public spending often pays out decades later Amid crises it is difficult to protect such investments but it is essential to do so Finally it is not enough just to spend wisely when additional revenue does need to be mobilized it must be done in a way that minimizes reductions in poor people s incomes The report highlights how exploring the underused forms of progressive taxation and increasing the efficiency of tax collection can help in this regard Poverty and Shared Prosperity is a biennial series that reports on global trends in poverty and shared prosperity Each report also explores a central challenge to poverty reduction and boosting shared prosperity assessing what works well and what does not in different settings By bringing together the latest evidence this corporate flagship report provides a foundation for informed advocacy around ending extreme poverty and improving the lives of the poorest in every country in the world For more information please visit worldbank.org/poverty-and-shared-prosperity Leave No One Behind Homi Kharas,John W. McArthur,Izumi Ohno,2019-10-29 The ambitious 15 year agenda known as the Sustainable Development Goals adopted in

2015 by all members of the United Nations contains a pledge that no one will be left behind This book aims to translate that bold global commitment into an action oriented mindset focused on supporting specific people in specific places who are facing specific problems In this volume experts from Japan the United States Canada and other countries address a range of challenges faced by people across the globe including women and girls smallholder farmers migrants and those living in extreme poverty These are many of the people whose lives are at the heart of the aspirations embedded in the 17 Sustainable Development Goals They are the people most in need of such essentials as health care quality education decent work affordable energy and a clean environment This book is the result of a collaboration between the Japan International Cooperation Research Institute and the Global Economy and Development program at Brookings It offers practical ideas for transforming leave no one behind from a slogan into effective actions which if implemented will make it possible to reach the Sustainable Development Goals by 2030 In addition to policymakers in the field of sustainable development this book will be of interest to academics activists and leaders of international organizations and civil society groups who work every day to promote inclusive economic and social progress

Just Climate Futures Carolyn Snell, Lucie Middlemiss, Kelli Kennedy, Emily Morrison, Anne Owen, Samanthi Themini, Tania Carregha, Yekaterina Chzhen, 2025-08-14 If we are to meet Net Zero targets both climate policies and our daily lives require significant change The transition towards Net Zero will lead to inevitable trade offs between social economic and environmental objectives and this transition could disproportionately impact households already struggling with poverty and precarity This book takes a deep dive into the ways families and communities are or could be impacted by the implementation of climate policy It demonstrates that participation in Net Zero requires people to be economically culturally socially and politically engaged and provides a practical roadmap to encourage and support a truly just transition
