book's uniqueness is further fortified through its description of informal conversations which are diffracted through chapters a doing of agential realism to reconfigure relationships between lecturer and student expert and novice supervisor and supervised researcher and research participants. These radical conversations are discontinuing. This book will be invaluable for students and individuals interested in advancing their understanding of agential realism and Karen Barad's influence at large as well as students and scholars interested in postqualitative methods in all disciplines. Edutopias Michael A. Peters, D. John Freeman-Moir, 2006. This unique collection of essays by well-known scholars from around the world examines the role of edutopias in the utopian tradition, examining its sources and sites as a means for understanding the aims and purposes of education for realizing its societal value and for criticizing its present economic, technological, and organizational modes.

Questioning and Teaching J.T. Dillon, 2004-06-04. Questions and questioning play a major role in both formal and informal educative processes. They are the means by which a child expresses the desire to understand the world outside and they subsequently become the means by which a teacher assesses whether or not a child has satisfactorily assimilated something. The teacher can also use questions to direct and control the course of students' studies. The ability and desire to question might be considered in itself one of the aims of education. This author has made an extensive study of the place of questioning in education and this book is the fullest record to date of that study. Its scope is comprehensive. It considers questions from the point of view of the one questioning and the one being questioned and considers pupil and teacher in both of these roles. This work is grounded in theory, research, and practice and is informed by research done in other fields such as psychotherapy, criminal interrogation, and computer science.
