Advances In Nutrition And Cancer Cancer Treatment And Research:

Advances in Nutrition and Cancer 2 Vincenzo Zappia, Fulvio della Ragione, Alfonso Barbarisi, Gian Luigi Russo, Rossano dello Iacovo, 2000-01-31 This volume includes contributions presented at the Second International Symposium on Nutrition and Cancer held in Naples Italy in October 1998 at the National Tumor Institute Fondazione Pascale During the Conference experts from different disciplines discussed pivotal and timely subjects on the interactions between human nutrition and the development of malignancies Comparing the themes of this Meeting with those discussed at the First Symposium in 1992 the major scientific advancements certainly derive from the extensive use of molecular approaches to perform research in nutrition Moreover the fundamental observation of R Doll and R Peto 1981 which suggested that at least 35% of all cancers with large differences among different tumors might be prevented by dietary regimens has been definitively confirmed by epidemiological studies On the other hand the relationships between diet and cancer are quite intricate and complex it is difficult and at the same time not methodologically correct to reduce them to simple terms Metabolic and hormonal factors contaminants and biological agents and deficiency of specific protective nutrients are all pieces of the same puzzle
