Learning and Big Data* José F Quesada, Francisco-Jesús Martín Mateos, Teresa López Soto, 2017-10-28 This book constitutes  
revised selected papers from the Second International Workshop on Future and Emerging Trends in Language Technology  
FETLT 2016 which took place in Seville Spain in November 2016 The 10 full papers and 5 position papers presented in this  
volume were carefully reviewed and selected from 18 submissions In 2016 the conference focused on Machine Learning and  
Big Data *Multimodal Usability* Niels Ole Bernsen, Laila Dybkjær, 2009-10-03 This preface tells the story of how  
Multimodal Usability responds to a special challenge Chapter 1 describes the goals and structure of this book The idea of  
describing how to make multimodal computer systems usable arose in the European Network of Excellence SIMILAR  
Taskforce for cre ing human machine interfaces SIMILAR to human human communication 2003 2007 www similar cc  
SIMILAR brought together people from multimodal signal processing and usability with the aim of creating enabling  
technologies for new kinds of multimodal systems and demonstrating results in research prototypes Most of our colleagues in  
the network were in fact busy extracting features and guring out how to demonstrate progress in working interactive  
systems while claiming not to have too much of a notion of usability in system development and evaluation It was proposed  
that the authors support the usability of the many multimodal pro types underway by researching and presenting a  
methodology for building usable multimodal systems We accepted the challenge rst and foremost no doubt because the  
formidable team spirit in SIMILAR could make people accept outrageous things Second h ing worked for nearly two decades

on making multimodal systems usable we were curious at the opportunity to try to understand what happens to traditional usability work that is work in human computer interaction centred around traditional graphical user interfaces GUIs when systems become as multimodal and as advanced in other ways as those we build in research today
