## National Artificial Intelligence Research Resource Task Force Releases Final Report

Today, the National Artificial Intelligence Research Resource (NAIRR) Task Force released its final report, a roadmap for standing up a national research infrastructure that would broaden access to the resources essential to artificial intelligence (AI) research and development.

While AI research and development (R&D) in the United States is advancing rapidly, opportunities to pursue cutting-edge AI research and new AI applications are often inaccessible to researchers beyond those at well-resourced companies, organizations, and academic institutions. A NAIRR would change that by providing AI researchers and students with significantly expanded access to computational resources, high-quality data, educational tools, and user support—fueling greater innovation and advancing AI that serves the public good.

“AI advances hold tremendous promise for tackling our hardest problems and achieving our greatest aspirations,” said **Arati Prabhakar, OSTP Director and Assistant to the President for Science and Technology**. “We will only realize this potential when many more kinds of researchers have access to the powerful capabilities that underpin AI advances.”

“Democratizing access to the cyberinfrastructure that fuels AI research and development will enable all of America’s diverse AI researchers to participate in exploring innovative ideas for advancing AI, including communities, institutions, and regions that have been traditionally underserved,” said **NSF Director Sethuraman Panchanathan**. “By creating an equitable cyberinfrastructure for cutting-edge AI that builds on-ramps for participation for a wide range of researchers and communities, the NAIRR could build AI capacity across the nation and support responsible AI research and development, thereby driving innovation and ensuring long-term U.S. competitiveness in this critical technology area.”

“OSTP’s work on AI, including the development of an updated National AI R&D Strategic Plan and the Blueprint for an AI Bill of Rights, is intended to maximize its benefits, while ensuring that AI-driven systems do not harm Americans’ rights or freedoms,” said **Deputy Assistant to the President and Principal Deputy U.S. Chief Technology Officer Alexander Macgillivray**. “We are excited about the release of the Task Force’s report
