A Rugged Nation Mountains And The Making Of Modern Italy:

A Rugged Nation Marco Armiero, 2011 This book is part of a wider current in environmental history that explores the links between nature and nation It uncovers how Italian identity and mountains have constituted one another

Mussolini's Nature Marco Armiero, Roberta Biasillo, Wilko Graf von Hardenberg, 2022-12-13 This exploration of the environmental practices of Benito Mussolini's fascist regime invites readers to consider the ecological connections of all political projects We might think we see a mountain while it was a war a forest can actually be an engine a monument to workers might reflect the violence of a colonial empire extracted from Mussolini's Nature In this first environmental history of Italian fascism Marco Armiero Roberta Biasillo and Wilko Graf von Hardenberg reveal that nature and fascist rhetoric are inextricable Mussolini's Nature explores fascist political ecologies or rather the practices and narratives through which the regime constructed imaginary and material ecologies functional to its political project The book does not pursue the ghost of a green Mussolini by counting how many national parks were created during the regime or how many trees planted Instead the reader is trained to recognize fascist political ecology in Mussolini's speeches reclaimed landscapes policies of economic self sufficiency propaganda documentaries reforested areas and in the environmental transformation of its colonial holdings The authors conclude with an examination of the role of fascist landscapes in the country's postwar reconstruction Mussolini's nature is still visible today through plaques monuments toponymy and the shapes of landscapes This original and surprisingly intimate environmental history is not merely a chronicle of conservation in fascist Italy but also an invitation to consider the socioecological connections of all political projects

Monsters, Catastrophes and the Anthropocene Gaia Giuliani, 2020-10-29 Monsters Catastrophes and the Anthropocene A Postcolonial Critique explores European and Western imaginaries of natural disaster mass migration and terrorism through a postcolonial inquiry into modern conceptions of monstrosity and catastrophe This book uses established icons of popular visual culture in sci fi doomsday and horror films and TV series as well as in images reproduced by the news media to help trace the genealogy of modern fears to ontologies and logics of the Anthropocene By logics of the Anthropocene the book refers to a set of principles based on ontologies of exploitation

extermination and natural resource exhaustion processes determining who is worthy of benefiting from value extraction and being saved from the catastrophe and who is expendable. Urban Narratives about Nature Carlos Tabernero, 2024-10-15. When more than half of the Earth population lives in cities and living conditions worldwide suffer from a steady increase in environmental issues, historical inquiry provides useful reflections and new perspectives on the present. *Urban Narratives about Nature: Socio-Ecological Imaginaries between Science and Entertainment* aims at generating specific historical knowledge concerning processes of production, circulation and management of natural history narratives and the associated struggles for meaning within the socio-ecological relations involved. The city is a powerful storyteller and this book, upon a relational perspective, provides a diverse and interrelated collection of case studies of urban-based production and circulation of narratives about nature. Altogether, these cases probe the complex relationships among scientific authority, public awareness, policymaking, corporate and political interests and environmental advocacy in effect, expanding the interdisciplinary linking of urban and environmental history within a global history view.

Crosses of Memory and Oblivion Miguel Ángel del Arco Blanco, 2023-07-31. This book explores the history and legacy of monuments to the fallen from the Francoist side in the Spanish Civil War. Del Arco Blanco studies thousands of monuments in towns and cities across Spain to provide a detailed account of the history and memory of the civil war, Francoism and the transition to democracy. Chapters in the book focus on the myth of those said to have fallen for God and for Spain, a phrase that encapsulated and shaped the dichotomy between good and bad Spaniards. They also focus on the use of monuments to control political and ideological ideals and to legitimise the Francoist dictatorship. Further chapters study Spanish society's struggle to deal with its past of mass killing, denial and exclusion. Del

Arco Blanco also pays attention to the way the Francoist authorities used monuments and memory for their political and ideological advantage and to control people power as well as the political agenda. The book draws on extensive research to reconstruct both the specific history of monuments scattered throughout the country and their role within manipulative Francoist memory of the Spanish Civil War. In these ways monuments helped shape the Francoist narrative and memory but they also became part of the landscape of contemporary Spanish history. This book is an excellent resource for postgraduate students and professional researchers studying the aftermath of the Spanish Civil War and the influence of monuments on the construction of national memory culture and society in Spain both at the time and through to the present day.

Island and Empire Uğur Z. Peçe, 2024-06-25

In the 1890s conflict erupted on the Ottoman island of Crete. At the heart of the Crete Question as it came to be known around the world were clashing claims of sovereignty between Greece and the Ottoman Empire. The island was of tremendous geostrategic value boasting one of the deepest natural harbors in the Mediterranean and the conflict quickly gained international dimensions with an unprecedented collective military intervention by six European powers. *Island and Empire* shows how events in Crete ultimately transformed the Middle East. Uğur Zekeriya Peçe narrates a connected history of international intervention, mass displacement and popular mobilization. The conflict drove a wedge between the island's Muslims and Christians, quickly acquiring a character of civil war. Civil war in turn unleashed a humanitarian catastrophe with the displacement of more than seventy thousand Muslims from Crete. In years following many of those refugees took to the streets across the Ottoman world driving the largest organized modern protest the empire had ever seen. Exploring both the emergence and legacies of violence *Island and Empire* demonstrates how Cretan refugees became the engine of protest across the empire from Salonica to Libya, sending ripples farther afield beyond imperial borders. This history that begins within an island becomes a story about the end of an empire.
