A Cultural History of Objects in the Age of Industry Carolyn White, 2022-08-31 A Cultural History of Objects in the Age of Industry covers the period 1760 to 1900 a time of dramatic change in the material world as objects shifted from the handmade to the machine made The revolution in making and in consuming the things which were made impacted on lives at every scale from body to home to workplace to city to nation Beyond the explosion in technology scientific knowledge manufacturing trade and museums changes in class structure politics ideology and morality all acted to transform the world of objects The 6 volume set of the Cultural History of Objects examines how objects have been created used interpreted and set loose in the world

over the last 2500 years Over this time the West has developed particular attitudes to the material world at the centre of which is the idea of the object The themes covered in each volume are objecthood technology economic objects everyday objects art architecture bodily objects object worlds Carolyn White is Professor at the University of Nevada Reno USA Volume 5 in the Cultural History of Objects set General Editors Dan Hicks and William Whyte [Building the British Atlantic World](#) Daniel Maudlin, Bernard L. Herman, 2016-03-11 Spanning the North Atlantic rim from Canada to Scotland and from the Caribbean to the coast of West Africa the British Atlantic world is deeply interconnected across its regions In this groundbreaking study thirteen leading scholars explore the idea of transatlanticism or a shared Atlantic world experience through the lens of architecture built spaces and landscapes in the British Atlantic from the seventeenth century through the mid nineteenth century Examining town planning churches forts merchants stores state houses and farm houses this collection shows how the powerful visual language of architecture and design allowed the people of this era to maintain common cultural experiences across different landscapes while still forming their individuality By studying the interplay between physical construction and social themes that include identity gender taste domesticity politics and race the authors interpret material culture in a way that particularly emphasizes the people who built occupied and used the spaces and reflects the complex cultural exchanges between Britain and the New World **Painting Dissent** Sophie Lynford, 2022-09-20 A revelatory history of the first artist collective in the United States and its effort to reshape nineteenth century art culture and politics The American Pre Raphaelites founded a uniquely interdisciplinary movement composed of politically radical abolitionist artists and like minded architects critics and scientists Active during the Civil War this dynamic collective united in a spirit of protest seeking sweeping reforms of national art and culture Painting Dissent recovers the American Pre Raphaelites from the margins of history and situates them at the center of transatlantic debates about art slavery education and politics Artists such as Thomas Charles Farrer and John Henry Hill championed a new style of landscape painting characterized by vibrant palettes antipicturesque compositions and meticulous brushwork Their radicalism however was not solely one of style Sophie Lynford traces how the American Pre Raphaelites proclaimed themselves catalysts of a wide ranging reform movement that staged politically motivated interventions in multiple cultural arenas from architecture and criticism to collecting exhibition design and higher education She examines how they publicly rejected their prominent contemporaries the artists known as the Hudson River School and how they offered incisive critiques of antebellum society by importing British models of landscape theory and practice Beautifully illustrated and drawing on a wealth of archival material Painting Dissent transforms our understanding of how American artists depicted the nation during the most turbulent decades of the nineteenth century *Tokens of a Friendship* Linda S.
