

The background of the book cover is a dark, out-of-focus photograph of city lights at night. On the left, there are several bright, rectangular light sources, possibly windows or streetlights, which appear as soft, glowing shapes. On the right, there are more numerous, smaller, and warmer-toned light sources, creating a bokeh effect. The overall mood is contemplative and somewhat somber, fitting the book's theme.

A Mood Apart Depression Mania And Other Afflictions Of The Self:

A Mood Apart Peter C. Whybrow, 2015-05-12 When first published in 1997 this groundbreaking work on the science of mood both redefined the field and with compassion understanding and scientific rigor made it accessible to those who would most benefit from the latest findings Now Peter Whybrow one of the world s most distinguished psychiatrists has updated his definitive account of mood disorders In *A Mood Apart* he argues that disorders such as depression constitute afflictions of the self exploring the human experience of manic depressive illness and rediscovering the human being behind the diagnosis Drawing on cutting edge research and his experience as a clinician he shows how the science and culture surrounding mood disorders have changed since the first edition Nearly two decades since its original publication *A Mood Apart* remains an essential book for anyone who has been affected by depression

The Master Illusionist Federico Sanchez, 2010-11-05 Federico Sanchez s interest in the brain began primarily related to artificial intelligence and computers while studying mechanical engineering at Tufts University in the early 70 s For the next three decades he studied the human brain sporadically as an ongoing hobby But after the death of his younger son by suicide in 2002 using the latest research on the brain he committed to explain not only how suicide is possible but how most other mental disorders come about He synthesized his findings in *The Master Illusionist Principles of Neuropsychology* a groundbreaking study on the inner workings of the human brain from an engineering perspective This is a new paradigm setting study which brings understanding to how our behavior perception cognition feelings and thoughts are generated and are interrelated The book focuses on the neurological connections between various structures of the brain and proposes the cortex the most noticeable evolutionary feature that distinguishes us from other mammals is many expanded memory systems The challenge becomes how to explain everything the human brain does based on these memory systems The interactions between these memory systems with each other and with the thalamus and basal ganglia is explained and a new perspective of who we are opens up new revolutionary possibilities for psychotherapy and pharmacology for mental disorders or other mental deficits The book devotes chapters to subjects such as the motor and visual systems smell memory synesthesia the generation and regulation of emotions autism attention deficit hyperactivity disorder mental disorders suicide and personality disorders
