A New Imperial History A New Imperial History:

A New Imperial History Kathleen Wilson, 2004-06-17 This pioneering collection of essays charts an exciting new field in British studies the new imperial history Leading scholars from history literature and cultural studies tackle problems of identity modernity and difference in eighteenth century Britain and the empire They examine from interdisciplinary perspectives the reciprocal influences of empire and culture the movements of peoples practices and ideas effected by slavery diaspora and British dominance and ways in which subaltern non western and non elite people shaped British power and knowledge The essays move through Britain America India Africa and the South Pacific in testament to the networks of people commodities and entangled pasts forged by Britain s imperial adventures Based on ground breaking research these analyses of the imperial dimensions of British culture and identities in global contexts will challenge the notion that empire was something that happened out there and they demonstrate its long lasting implications for British identity and everyday life *A New Imperial History of Northern Eurasia, 1700-1918* Marina B. Mogilner, Alexander Semyonov, Ilya V. Gerasimov, Sergey Glebov, 2025-02-20

A New Imperial History of Northern Eurasia 1700 1918 proposes a new language for studying and conceptualizing the spaces societies and institutions that existed on the territory of today s Northern Eurasia until recently part of the USSR Traditional concepts and genealogies that frame human experience have to be avoided or reframed this is not the story of a certain present day state or people evolving through consecutive historical stages Rather the book s point of departure is a modern analytical approach to the problem of human diversity as a fundamental social condition In the form of cooperation and confrontation various attempts to manage diversity fostered processes of societal self organization as new ideas practices and institutions were developed virtually from scratch or radically altered when borrowed Essentially this is the story of individuals and societies who creatively responded to their natural and social environments and sought answers to universal problems in unique historical circumstances This volume which brings together leading scholars from both the United States and Russia covers the period during which the enormous landmass from the Carpathian Mountains in the west to the Pacific Ocean in the east from the Polar Circle in the north to the steppe belt in the south was put under the control of a single polity the Russian Empire Previously the competing local scenarios of self organization had taken specific political forms that suited them best This book shows that the Russian Empire faced the daunting task of coordinating multifaceted diversity within a single political and legal body under constantly changing domestic and international circumstances The study reveals that to this end the imperial regime employed various means from violence to science from segregation to integration and yet was still unable to block multiple political actors within the empire from advancing their own strategies of belonging resistance and participation ***A New Imperial History of Northern Eurasia, 600-1700*** Marina B. Mogilner, Ilya V. Gerasimov, Sergey Glebov, Alexander Semyonov, 2023-10-19 *A New Imperial History of Northern Eurasia 600 1700* proposes a new language for studying and conceptualizing the spaces

societies and institutions that existed on the territory of today's Northern Eurasia. This is not the story of a certain present-day state or people evolving through consecutive historical stages. Rather, the book is a modern analytical approach to the problem of human diversity as a fundamental social condition. Through cooperation and confrontation, various attempts to manage diversity fostered processes of societal self-organization as new ideas, practices, and institutions were developed virtually from scratch or radically altered. Essentially, this is the story of individuals and societies creatively responding to their natural and social environments in unique historical circumstances. This volume explores how the mutual interactions of several local socio-political arrangements and attempts to integrate with one of the universal cultures of the time caused a string of unintended consequences. As a result, the enormous landmass from the Carpathian Mountains in the west to the Pacific Ocean in the east, from the Polar Circle in the north to the steppe belt in the south, was divided among several regional powers. Ultimately unable to overtake each other by military force, they were locked in a zero-sum game until the uneven development of modern state institutions tilted the balance in favor of one of them: Russia.

Tudor Empire Jessica S. Hower, 2020-12-17 This book recasts one of the most well-studied and popularly beloved eras in history: the tumultuous span from the 1485 accession of Henry VII to the 1603 death of Elizabeth I. Though many have gravitated toward this period for its high drama and national importance, the book offers a new narrative by focusing on another facet of the British past that has exercised an equally powerful grip on audiences: imperialism. It argues that the sixteenth century was pivotal to the making of both Britain and the British Empire. Unearthing over a century of theorizing about and probing into the world beyond England's borders, *Tudor Empire* shows that foreign enterprise at once mirrored, responded to, and provoked domestic politics and culture while decisively shaping the Atlantic World. Demonstrating that territorial expansion abroad and national consolidation and identity formation at home were concurrent, intertwined, and mutually reinforcing, the author examines some of the earliest ventures undertaken by the crown and its subjects in France, Scotland, Ireland, and the Americas. *Tudor Empire* is a thought-provoking, essential read for those interested in the Tudors and the British Empire that they helped create.

Benevolent Colonizers in Nineteenth-Century Australia Eva Bischoff, 2020-01-02 This book reconstructs the history of a group of British Quaker families and their involvement in the process of settler colonialism in early nineteenth-century Australia. Their everyday actions contributed to the multiplicity of practices that displaced and annihilated Aboriginal communities. Simultaneously, early nineteenth-century Friends were members of a translocal, transatlantic community characterized by pacifism and an involvement in transnational humanitarian efforts such as the abolitionist and the prison reform movements, as well as the Aborigines Protection Society. Considering these ideals, how did Quakers negotiate the violence of the frontier? To answer this question, the book looks at Tasmanian and South Australian Quakers' lives and experiences, their journeys, and their writings. Building on recent scholarship on the entanglement between the local and the global, each chapter adopts a different historical perspective in terms of breadth and focused time period. The study combines

these different takes to capture the complexities of this topic and era *The Colonial Past in History Textbooks* Karel Van Nieuwenhuyse, Joaquim Pires Valentim, 2018-05-01 This book examines the evolving representations of the colonial past from the mid 19th century up to decolonization in the 1960s and 70s the so called era of Modern Imperialism in post war history textbooks from across the world The aim of the book is to examine the evolving outlook of colonial representations in history education and the underpinning explanations for the specific outlook in different former colonizer and colonized countries to be found in collective memory popular historical culture social representations identity building processes and the state of historical knowledge within academia The approach of the book is novel and innovative in different ways First of all given the complexity of the research an original interdisciplinary approach has been implemented which brings together historians history educators and social psychologists to examine representations of colonialism in history education in different countries around the world while drawing on different theoretical frameworks Secondly given the interest in the interplay between collective memory popular historical culture social representations and the state of historical knowledge within academia a diachronic approach is implemented examining the evolving representations of the colonial past and connecting them to developments within society at large and academia This will allow for a deeper understanding of the processes under examination Thirdly studies from various corners of the world are included in the book More specifically the project includes research from three categories of countries former colonizer countries including England Spain Italy France Portugal and Belgium countries having been both colonized and colonizer Chile and former colonized countries including Zimbabwe Malta and Mozambique This selection allows pairing up the countries under review as former colonizing colonized ones for instance Portugal Mozambique United Kingdom Malta allowing for an in depth comparison between the countries involved Before reaching the research core three introductory chapters outline three general issues The book starts with addressing the different approaches and epistemological underpinnings history and social psychology as academic disciplines hold In a second chapter evolutions within international academic colonial historiography are analyzed with a special focus on the recent development of New Imperial History A third chapter analyses history textbooks as cultural tools and political means of transmitting historical knowledge and representations across generations The next ten chapters form the core of the book in which evolving representations of colonial history from mid 19th century until decolonization in the 1960s and 1970s are examined explained and reflected upon for the above mentioned countries This is done through a history textbook analysis in a diachronic perspective For some countries the analysis dates back to textbooks published after the Second World War for other countries the focus will be more limited in time The research presented is done by historians and history educators as well as by social psychologists In a concluding chapter an overall overview is presented in which similarities and differences throughout the case studies are identified interpreted and reflected upon **From Policemen to Revolutionaries: A Sikh Diaspora in Global Shanghai, 1885-1945** Yin Cao, 2017-10-10 From Policemen to Revolutionaries uncovers the less known

story of Sikh emigrants in Shanghai in the late nineteenth and early twentieth centuries Yin Cao argues that the cross border circulation of personnel and knowledge across the British colonial and the Sikh diasporic networks facilitated the formation of the Sikh community in Shanghai eventually making this Chinese city one of the overseas hubs of the Indian nationalist struggle By adopting a translocal approach this study elaborates on how the flow of Sikh emigrants largely regarded as subalterns initially strengthened but eventually unhinged British colonial rule in East and Southeast Asia The Colonial World Robert Aldrich, Andreas Stucki, 2022-12-29 The Colonial World A History of European Empires 1780s to the Present provides the most authoritative in depth overview on European imperialism available It synthesizes recent developments in the study of European empires and provides new perspectives on European colonialism and the challenges to it With a post 1800 focus and extensive background coverage tracing the subject to the early 1700s the book charts the rise and eclipse of European empires Robert Aldrich and Andreas Stucki integrate innovative approaches and findings from the new imperial history and look at both the colonial era and the legacies it left behind for countries around the world after they gained independence Dividing the text into three complementary sections Aldrich and Stucki offer an original approach to the subject that allows you to explore Different eras of colonisation and decolonisation from early modern European colonialism to the present day Overarching themes in colonial history like land and sea the body and representations of colonialism A global range of snapshot colonial case studies such as Peru 1780 India 1876 The South Pacific 1903 the Dutch East Indies 1938 and the Portuguese empire in Africa 1971 This is the essential text for anyone seeking to understand the nature and complexities of modern European imperialism and its aftermath *National History and New Nationalism in the Twenty-First Century* Niels F. May, Thomas Maissen, 2021-06-17 National history has once again become a battlefield In internal political conflicts which are fought on the terrain of popular culture museums schoolbooks and memorial politics it has taken on a newly important and contested role Irrespective of national specifics the narratives of new nationalism are quite similar everywhere National history is said to stretch back many centuries expressing the historical continuity of a homogeneous people and its timeless character This people struggles for independence guided by towering leaders and inspired by the sacrifice of martyrs Unlike earlier forms of nationalism the main enemies are no longer neighbouring states but international and supranational institutions To use national history as an integrative tool new nationalists claim that the media and school history curricula should not contest or question the nation and its great historical deeds as doubts threaten to weaken and dishonour the nation This book offers a broad international overview of the rhetoric contents and contexts of the rise of these renewed national historical narratives and of how professional historians have reacted to these phenomena The contributions focus on a wide range of representative nations from around all over the globe *Empire De/Centered* Maxim Waldstein, Sanna Turoma, 2016-05-06 In 1991 the Soviet empire collapsed at a stroke throwing the certainties of the Cold War world into flux Yet despite the dramatic end of this last empire the idea of empire is still alive and well its language

and concepts feeding into public debate and academic research Bringing together a multidisciplinary and international group of authors to study Soviet society and culture through the categories empire and space this collection demonstrates the enduring legacy of empire with regard to Russia whose history has been marked by a particularly close and ambiguous relationship between nation and empire building and between national and imperial identities Parallel with this discussion of empire the volume also highlights the centrality of geographical space and spatial imaginings in Russian and Soviet intellectual traditions and social practices underlining how Russia's vast geographical dimensions have profoundly informed Russia's state and nation building both in practice and concept Combining concepts of space and empire the collection offers a reconsideration of Soviet imperial legacy by studying its cultural and societal underpinnings from previously unexplored perspectives In so doing it provides a reconceptualization of the theoretical and methodological foundations of contemporary imperial and spatial studies through the example of the experience provided by Soviet society and culture
