Act-Based Conceptions of Propositional Content Friederike Moltmann, Mark Textor, 2017-07-03 The notion of a propositional content plays a central role in contemporary philosophy of language Propositional content makes up both the meaning of sentences and the content of propositional attitudes such as belief One particular view about propositional content has been dominant in analytic philosophy namely the Fregean conception of propositions as abstract mind independent objects that come with truth conditions But propositions in this sense raise a range of issues which have become a center of debate in current philosophy of language In particular how should propositions as abstract objects be understood and how can they represent things and be true or false A number of philosophers in contemporary analytic philosophy as well as in early analytic philosophy and phenomenology have approached the notion of a propositional content in a different way not by starting out with an abstract truth bearer but by focusing on cognitive acts of agents such as acts of judging It is in

terms of such acts that the notion of a propositional content on their view should be understood The act based perspective historically goes back to the work of Central European philosophers in particular that of Husserl Twardowski Meinong and Reinach However their work has been unduly neglected and is in fact largely inaccessible to contemporary analytic philosophers The volume presents a central selection of work of these philosophers that bear on an act based conception of philosophical content some of which in new translations one paper by Reinach some of which published in English for the very first time two papers by Twardowski In addition the volume presents new work by leading contemporary philosophers of language pursuing or discussing an act based conception of propositional content Moreover the book contains a crosslinguistic study of nominalizations for actions and products a distinction that plays a central role in the philosophy of language of Twardowski

Advances in Soft Computing and Its Applications Félix Castro,Alexander Gelbukh,Miguel González,2013-11-18 The two volume set LNAI 8265 and LNAI 8266 constitutes the proceedings of the 12th Mexican International Conference on Artificial Intelligence MICA 2013 held in Mexico City Mexico in November 2013 The total of 85 papers presented in these proceedings were carefully reviewed and selected from 284 submissions The first volume deals with advances in artificial intelligence and its applications and is structured in the following five sections logic and reasoning knowledge based systems and multi agent systems natural language processing machine translation and bioinformatics and medical applications The second volume deals with advances in soft computing and its applications and is structured in the following eight sections evolutionary and nature inspired metaheuristic algorithms neural networks and hybrid intelligent systems fuzzy systems machine learning and pattern recognition data mining computer vision and image processing robotics planning and scheduling and emotion detection sentiment analysis and opinion mining
