Adventures In Transcendental Dialogues With Contemporary Thinkers:

Adventures in Transcendental Materialism Adrian Johnston, 2014-03-17 Critically engaging with thinkers including Slavoj Žižek Alain Badiou Catherine Malabou Jean Claude Milner Martin Hagglund William Connolly and Jane Bennett Johnston formulates a materialist and naturalist account of subjectivity that does full justice to human beings as irreducible to natural matter alone

Schelling's Naturalism Woodard Ben Woodard, 2018-12-06 Using Schelling's philosophy Ben Woodard examines how an expanded form of naturalism changes how we conceive of the division between thought and world mathematics and motion sense and dynamics experiment and materiality as well as speculation and pragmatism Nature in Schelling's eyes is not the great outdoors or some authentic pastoral realm but the various powers processes and tendencies which run through biology chemistry physics and the very possibility of thought itself

Apocalyptic Political Theology Thomas Lynch, 2019-01-24 Hegel's philosophy of religion contains an implicit political theology When viewed in connection with his wider work on subjectivity history and politics this political theology is a resource for apocalyptic thinking In a world of climate change inequality oppressive gender roles and racism Hegel can be used to theorise the hope found in the end of that world Histories of apocalyptic thinking draw a line connecting the medieval prophet Joachim of Fiore and Marx This line passes through Hegel who transforms the relationship between philosophy and theology by philosophically employing theological concepts to critique the world Jacob Taubes provides an example of this Hegelian political theology weaving Christianity Judaism and philosophy to develop an apocalypticism that is not invested in the world Taubes awaits the end of the world knowing that apocalyptic destruction is also a form of creation Catherine Malabou discusses this relationship between destruction and creation in terms of plasticity Using plasticity to reformulate

apocalypticism allows for a form of apocalyptic thinking that is immanent and materialist Together Hegel Taubes and Malabou provide the resources for thinking about why the world should end The resulting apocalyptic pessimism is not passive but requires an active refusal of the world

Derrida and the Legacy of Psychoanalysis Paul Earlie, 2021-02-04 In Derrida and the Legacy of Psychoanalysis Paul Earlie offers a detailed account of the importance of psychoanalysis in Derrida's thought Based on close readings of texts from the whole of his career including less well known and previously unpublished material the title sheds new light on the crucial role of psychoanalysis in shaping Derrida's response to a number of key questions These questions range from the psyche's relationship to technology to the role of fiction and metaphor in scientific discourse and from the relationship between memory and the archive to the status of the political in deconstruction Focusing on Freud but proposing new readings of texts by Lacan Torok and Abraham Laplanche and Pontalis amongst other seminal figures in contemporary French thought Earlie argues that Derrida's writings on psychoanalysis can also provide an important bridge between deconstruction and the recent materialist turn in the humanities Challenging a still prevalent textualist reading of Derrida's work he explores the ongoing contribution of deconstruction and psychoanalysis to pressing issues in critical thought today from the localizing models of the neurosciences and the omnipresence of digital technology to the politics of affect in an age of terror

God Is Undead Lorenzo Chiesa, Adrian Johnston, 2025-02-20 The undead are neither alive nor dead They are animate yet non living In God Is Undead Lorenzo Chiesa and Adrian Johnston contend that true unbelief today sees the divine precisely as exemplifying such undeath In God Is Undead Chiesa and Johnston delve into and deepen the insights of both Freudian and Lacanian

psychoanalysis as regards unbelief This analytic perspective reveals that modern atheisms appealing to a scientific worldview as an antidote to orthodox religious faith end up as heterodox theisms of Nature Reason Knowledge or even the Market itself They ironically place new gods of their own atop the graves of the traditional gods of old They likewise forget the religious influences underlying modern science One of the most important and novel contributions of *God Is Undead* is its gesture of dignifying unbelief as something that is able to contain multitudes Far from a unified homogeneous and flatly bleak position irreligiosity can come in many forms whose convergences and divergences contain possibilities for creatively thinking and living differently This book shows such variegated non belief in action We have two unbelievers vigorously disagreeing with each other about fundamental ontological matters thereby bringing to light critical questions going to the very heart of any unbelief whatsoever Can an atheism as thoroughly atheistic ever believe in or be certain of itself What is the role of agnosticism and specifically of an agnosticism strengthening rather than contrasting with atheism in all this How might different unbelievers become what Freud calls comrades in unbelief without erecting new gods in the process

Schelling, Hegel, and the Philosophy of Nature Benjamin Berger, 2023-11-30 This book develops an original interpretation of the relationship between F W J Schelling and G W F Hegel It argues that the difference between these philosophers should be understood in light of their shared commitment to the philosophy of nature and the idea that spirit or humanity emerges from the natural world The author makes a case for the contemporary relevance of German idealist philosophy of nature by walking the reader through its major themes motivations and arguments Along the way Schelling and Hegel are shown to develop key insights about the structure of reality and the dependence of living things and human beings upon inorganic natural processes In elucidating the details of Schelling's and Hegel's respective philosophies of nature the book challenges some of our most basic assumptions about the scope of philosophical inquiry and the relationship between matter life and human existence Schelling Hegel and the Philosophy of Nature will appeal to scholars and advanced students working on German idealism as well as those interested in contemporary philosophies of nature and the topic of emergence

Mirror of Nature, Mirror of Self Dimitry Shevchenko, 2023 *Mirror of Nature* *Mirror of Self* considers theories of consciousness in Indian philosophical traditions through the metaphor of reflection in a mirror Just as a face appears where it is not in a mirror's reflection so do consciousness and its properties such as the sense of self subjectivity and experience In a dialogue with psychoanalytical theory and contemporary philosophy of mind the book develops a new model of consciousness and contributes to contemporary debates
