Wagner, 2012-03-12 Godwired offers an engaging exploration of religious practice in the digital age It considers how virtual experiences like stories games and rituals are forms of world building or cosmos construction that serve as a means of making sense of our own world Such creative and interactive activity is arguably patently religious This book examines the nature of sacred space in virtual contexts technology as a vehicle for sacred texts who we are when we go online what rituals have in common with games and how they work online what happens to community when people worship online how religious worlds and virtual worlds nurture similar desires Rachel Wagner suggests that whilst our engagement with virtual reality can be viewed as a form of religious activity today s virtual religion marks a radical departure from traditional religious practice it is ephemeral transient rapid disposable hyper individualized hybrid and in an ongoing state of flux
