Hoover, 2001-08-13 First published in 2001 Causality in Macroeconomics addresses the long standing problems of causality while taking macroeconomics seriously The practical concerns of the macroeconomist and abstract concerns of the philosopher inform each other Grounded in pragmatic realism the book rejects the popular idea that macroeconomics requires microfoundations and argues that the macroeconomy is a set of structures that are best analyzed causally Ideas originally due to Herbert Simon and the Cowles Commission are refined and generalized to non linear systems particularly to the non linear systems with cross equation restrictions that are ubiquitous in modern macroeconomic models with rational expectations with and without regime switching These ideas help to clarify philosophical as well as economic issues The structural approach to causality is then used to evaluate more familiar approaches to causality due to Granger LeRoy and Glymour Spirtes Scheines and Kelly as well as vector autoregressions the Lucas critique and the exogeneity concepts of Engle Hendry and Richard **Intermediate Macroeconomics: A Statistical Approach** Douglas

Economic Politics in the United States William R. Keech, 2013-10-14 Employing macroeconomic performance as a lens to evaluate democratic institutions the author uses models of political behavior that allow for opportunism on the part of public officials and shortsightedness on the part of voters to see if democratic institutions lead to inferior macroeconomic performance We have learned more about how and why democracy can work well or badly in the years since the first edition was published It was not previously apparent how much the good performance of democracy in the United States was contingent on informal rules and institutions of restraint that are not part of the definition of democracy Since that first edition the United States has experienced soaring indebtedness unintended adverse consequences of housing policy and massive problems in the financial system Each of these was permitted or encouraged by the incentives of electoral politics and by limitations on government the two essential features of democratic institutions
