How to Write a Chemistry Lab Report

- **Reading** (see also the following information)
 - Your teacher/Partner/Group should appreciate, then discuss, this
- **Introduction** (paragraph)
 - Include any information that introduces the concepts explored in this lab. This section should "set the scene" for the rest of the lab report. (In fact, the rest of the lab is almost entirely based on what follows "what" and "how".)
- **Purpose** (a sentence)
 - Complete the sentence "The purpose of this experiment is to..."
- **Materials** (list)
 - Make a list of all materials used in the lab investigation.
- **Procedure** (written for one's paragraph)
 - Follow in the third person (no pronouns)
 - Use past tense (not Latin past participles) - this helps avoid the "cookbook" format
 - A procedure should be written in that order you actually do the experiment, not a "cookbook" order
- **Observations** (an or paragraph)
 - The description you see, smell, feel and hear/feel etc.
 - Include any tables, graphs, diagrams, etc. (use a ruler's footprints)
 - Diagrams should be drawn/finished during the process and should be on graph paper (use a ruler to compare and contrast). You must include labels, units, legends, etc.
- **Questions** (if you have them, these points will be addressed in the conclusion)
 - Answer the questions at the end of the lab or (if you have them)
 - Do you have any questions?
- **Conclusion** (paragraph is a sentence)
 - This section is the only one that is a paragraph
 - Provide a brief summary of the lab (in a sentence)
 - The results of this lab activity are...
 - These concepts were explained by...
 - Summarize the results "What evidence supports the results? What evidence refutes the results?"
 - These results are valid because...
 - These results are invalid because...
 - The results obtained actually suggest...
 - Answer the lab questions
 - How would the results compare to...
 - A comparison to real life is...
 - This is similar to...
 - Answer possible questions about the lab (in a sentence)
 - This lab would be improved by...
 - One could further investigate what they were doing...
 - Answer any other questions that you did not have before
 - Address questions you may still have
 - While this experiment addressed..., it is still something that...
